

# Bounce Mouthguards - About Me Page

---

My name is Marnie, and I am a dental prosthetist with over 20 years of experience in the dental field. I hold a Diploma of Dental Technology and an Advanced Diploma of Dental Prosthetics, which I obtained at Central Institute of Technology in 2011. At Bounce Mouthguards (inside my Perth Denture Care clinic), my work involves designing and making custom-fitted sports mouthguards for athletes of all ages.

The goal is simple: provide mouthguards that fit well, feel comfortable, and offer reliable protection on the field, court, or in the ring. Every mouthguard is made individually, with close attention to detail, so that players can focus on their performance rather than worrying about their smile.

## **I am committed to:**

- Providing safe, professional, and ethical care.
- Ensuring players and parents understand their options.
- Creating mouthguards that balance comfort, durability, and protection.
- Maintaining up-to-date knowledge and skills through ongoing professional development.

In addition to appointments at the clinic, I also provide mobile services for schools and sporting clubs, making it easier for teams to be fitted together.

Whether it's for school sport, weekend competition, or high-contact athletics, my focus is on helping athletes stay protected with mouthguards that fit with precision.
