

Protect Your Smile with a Custom Mouthguard

WHY CHOOSE A CUSTOM MOUTHGUARD?

Not all mouthguards are created equal. Chemist-bought “boil and bite” guards might seem convenient, but they often provide poor fit and limited protection. A custom mouthguard, professionally fitted to your teeth and bite, offers:

- **Maximum Protection** – absorbs impact and helps prevent broken teeth, jaw injuries, and concussions.
- **Superior Comfort** – designed to fit snugly, making it easier to breathe and talk while playing.
- **Durability** – crafted from high-quality dental materials that outlast off-the-shelf options.

WHO NEEDS ONE?

Contact sports like football, rugby, hockey, boxing. High-impact activities such as basketball, martial arts, or skateboarding. Anyone who values protecting their natural teeth or dental work.

PERSONALISE YOUR STYLE

Stand out on the field with your choice of colours, patterns, and style combinations:

- *Team colours*
- *Marbled, striped, and chequered patterns*
- *Clear or solid shades*
- *Add your name or player number*

WHY BOUNCE MOUTHGUARDS BY PERTH DENTURE CARE?
