

House floorplan - redesign

Wish list

- Small area for recording studio / music room
- Bedrooms to have ensuite.
- Master bedroom to have walk-in wardrobe
- Downstairs toilet
- More light downstairs
- Improved views of countryside from upstairs (perhaps switch upstairs and downstairs around to accommodate this, and put bedrooms downstairs and living space/kitchen upstairs?)
- Study doesn't have to be as big as it is currently.
- Library/area assigned for books (doesn't have to be a whole room, could be a corridor)

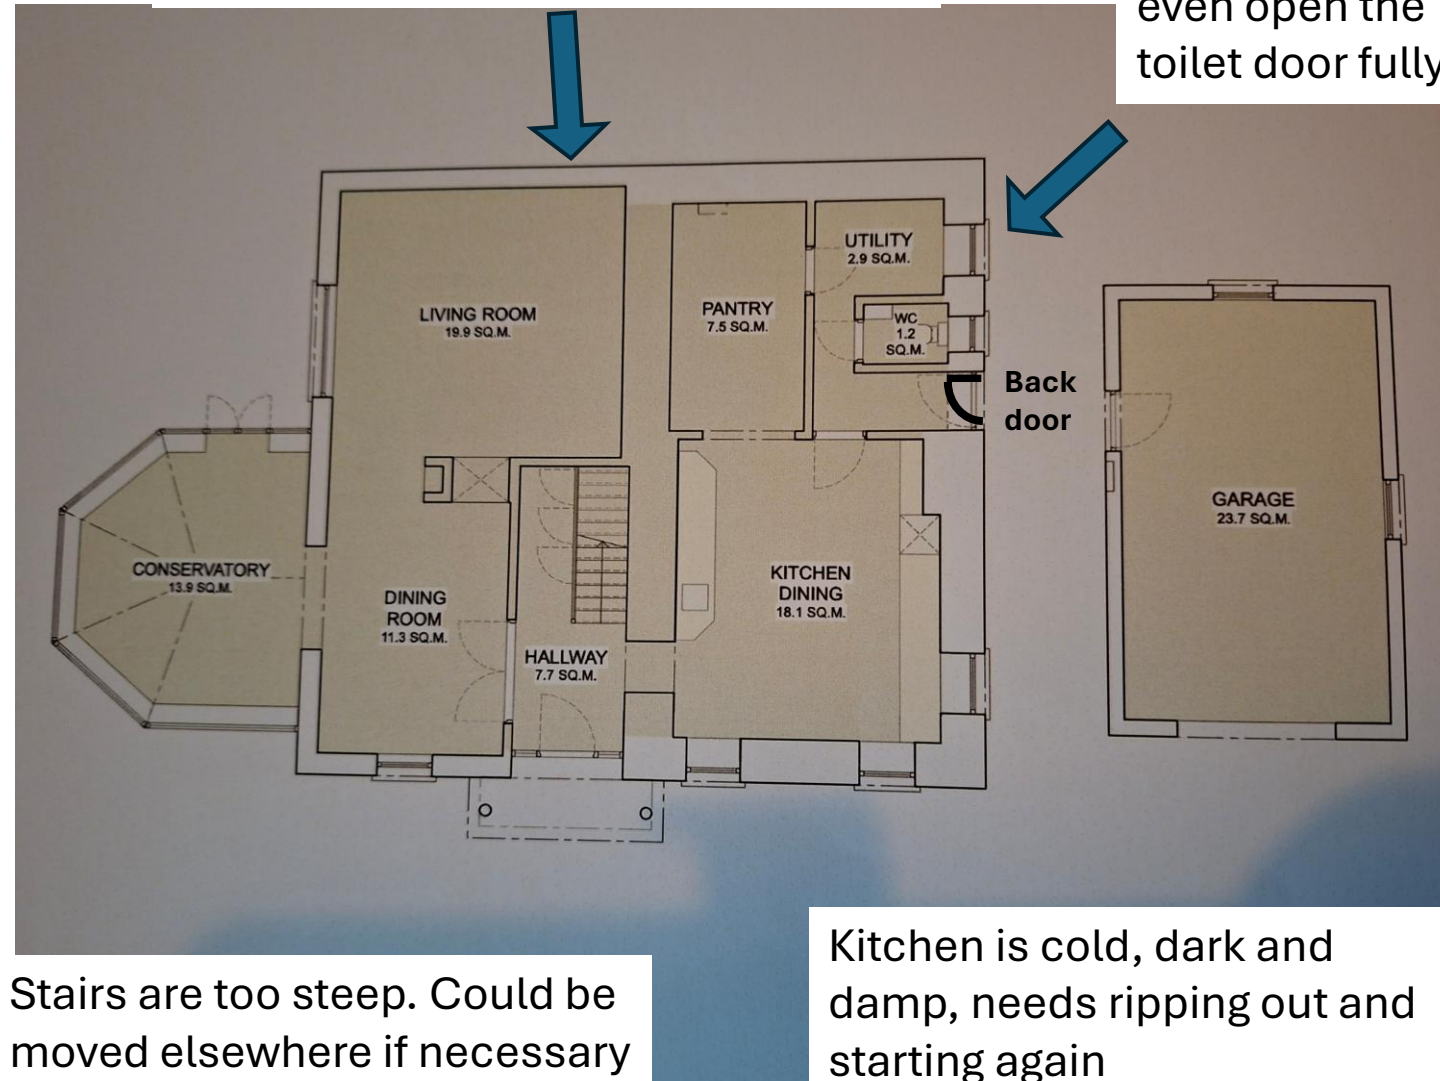

NB – If the bedrooms all had ensuites, we wouldn't need a family bathroom and could use this space for something else

If you move the stairs, make sure where they disappear from the ground floor, that they reappear in the same location on the first floor.

Consider existing solid, stone walls (only remove if necessary – easier to keep them as they are)

Current Downstairs floorplan area

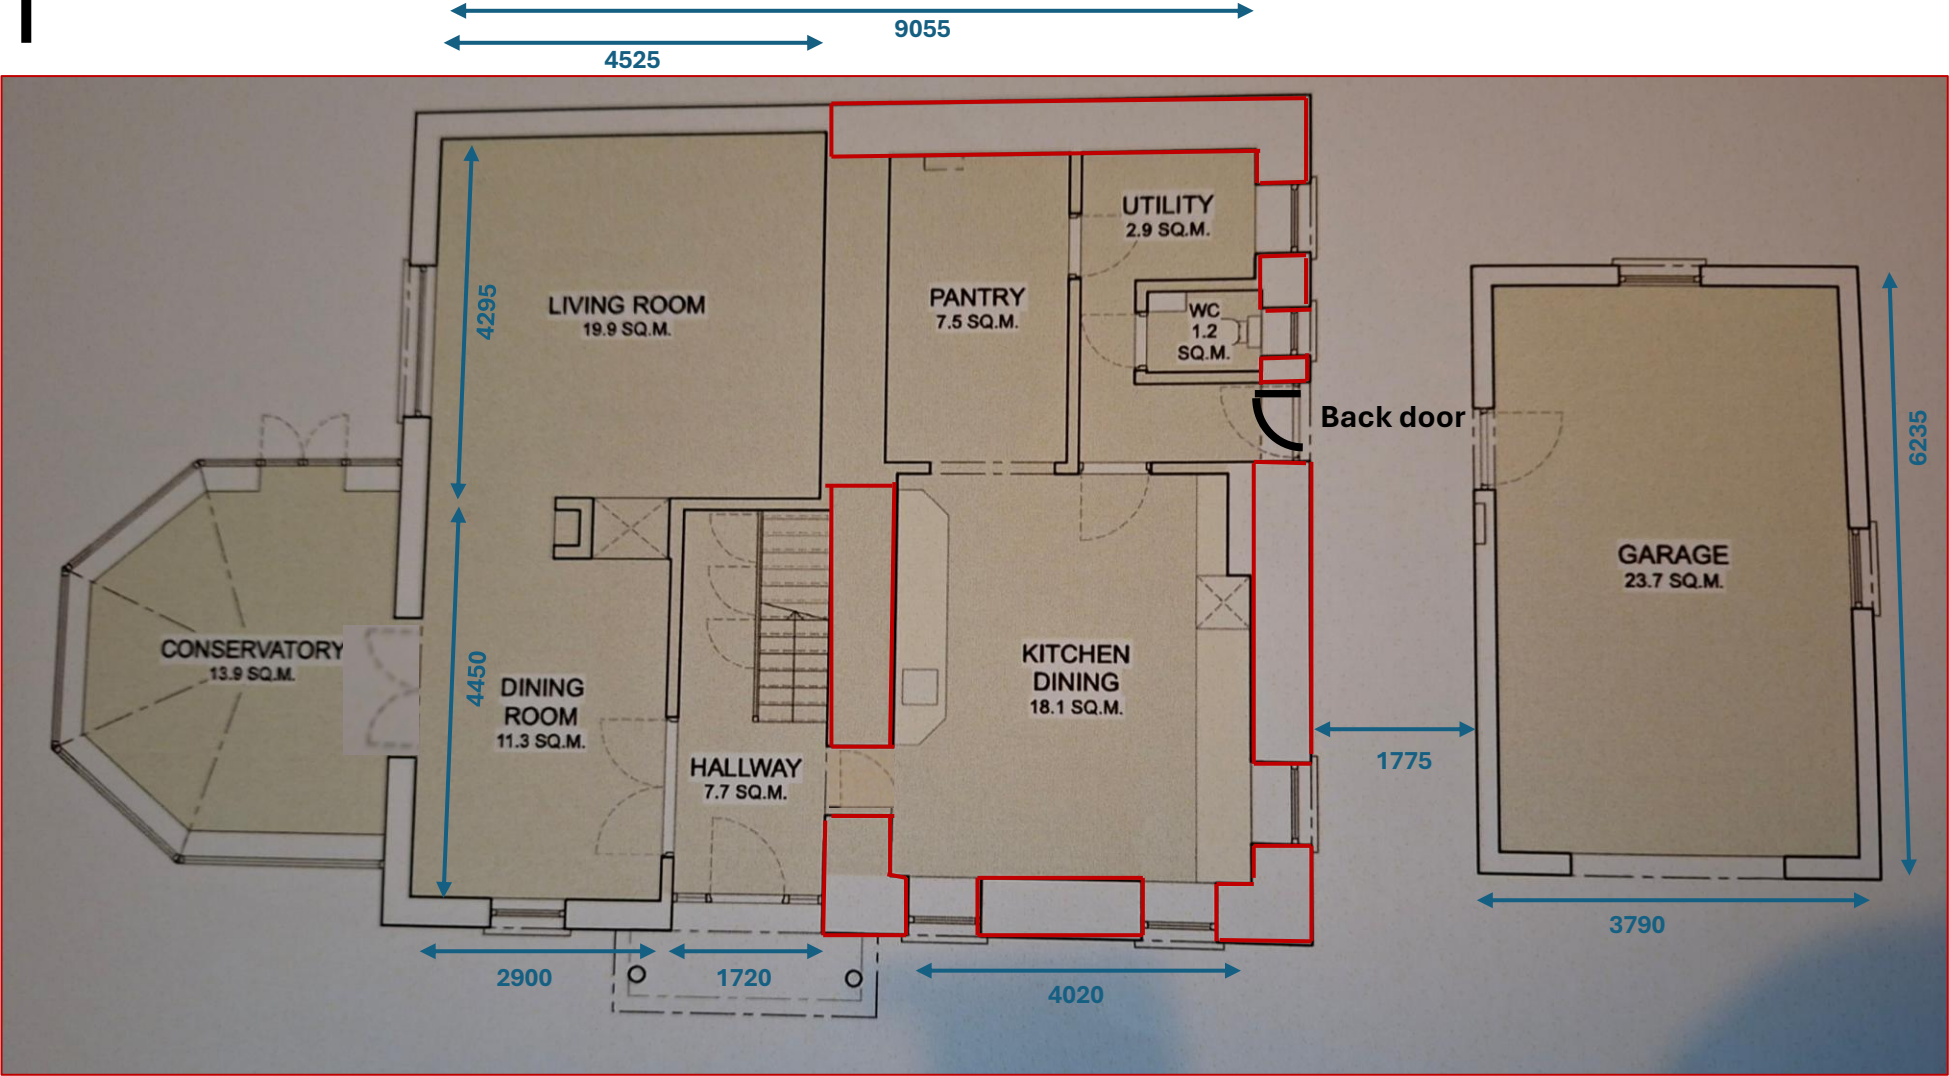

**Please include
two options:**

#1 Existing shape
(but redesigned
interior)

#2 New design that
incorporates a
house extension to
include the garage
