- ▶ Earth Retention & Shoring Systems
- ▶ Shotcrete
- ▶ Auger Cast Piles
- ▶ Secant & Soil-Mixing
- ▶ High Pressure grouting

QUALITY STARTS AT THE FOUNDATION

Anchor Point Construction is a self-performing foundation and geotechnical general contractor serving the tri-state market. We specialize in foundations, deep piles, ground improvement, shoring and earth retention systems, and reinforced concrete structures — the critical first phase of every successful project.

Built by experienced professionals and skilled craftsmen, we hold safety to the highest standard expected in New York City and across the tri-state region. Every project is executed with the discipline and rigor the work demands.

Anchor Point brings precision, accountability, and true partnership to ground-level work — because what's below the surface determines everything above it.
