

CSA Program Overview

Conservation Services of America (CSA) A Conservation Solutions Company

CSAWater's Goal is to provide property owners with the most advanced water saving products and services available. We tailor these products and services to each customer because every property is uniquely different.

OUR PLEDGE is to maximize curb appeal by reducing unnecessary waste without sacrificing quality.

Helping Businesses

Improve Efficiencies

Reduce Costs

Increase Environmental
Stewardship

Develop Healthier
Landscapes

Benefit from Technology

Reduce Waste

Property Owner Benefits

- Lower water costs
- Reduced hardscape damage
- Lower repair and maintenance costs to systems

Environmental Benefits

- Lowering outdoor water consumption reduces waste and recycling processes
- Increased plant health by strengthening root zones (lessens disease, insects, drought and storm damage)
- Reduces fertilizer leaching
- Lowers electrical consumption

Three Step Process

1	2	3
Water Budget	Site Audit	Custom Program
<ul style="list-style-type: none"> • Gather historical water bills • Build preliminary water budget • Compare historical usage to water budget • Assess savings opportunities • Advance to Step 2 	<ul style="list-style-type: none"> • Site Audit <ul style="list-style-type: none"> • Accurate landscape measurements • Detailed plant types per irrigation zone • Current scheduling • Detailed report • Verify water budget • Discuss opportunities with customer • Advance to Step 3 	<ul style="list-style-type: none"> • Develop baseline water usage • Install water saving devices • Monitor plants and irrigation components • Generate monthly usage reports

Programs Designed To Fit Your Needs
