

Business Card Design Details Must Have

The Business Card is 2 sided.

The Background Color should be Dark Blue almost Black but NOT Black. Custom color to make the font and Logo stand out and have good contrast.

The Logo should be 3D or 4D

The Company Name should also be 3D or 4D to match the Logo

The Business Card will be printed in high gloss and Raised printing

The Font Size and Font color for the rest of the business card either should be White or Grey to match the background color contrast.

The back side of the Card should have large Company Logo to cover the entire page and matching Font Size

Some examples I really like

3D Company Image from one of the Designers

Font Size and Style from one of the Designers

Really Like Font Style from one of the Designers
