

GMT Mobile

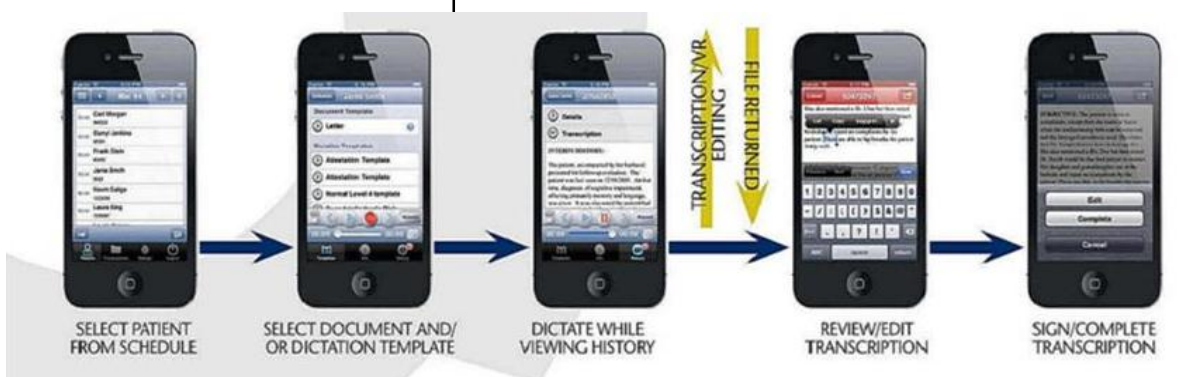

Convenient Capture and Management of Clinical Documentation

GMT Mobile allows healthcare providers the ability to dictate using their favorite Apple IOS or Android device. With the ability to view their schedules, dictation becomes as simple as clicking on a patient name. When utilizing our advanced Mobile Application, prior and current transcribed reports can be viewed, edited, and signed anywhere, at anytime, or in any place with a smart phone or mobile device utilizing a Wi-Fi or cellular data connection.

Dictations in the palm of your hand

Robust functionality that maximizes productivity

- Convenient, easy to use, and fits any clinicians workflow preferences
- Real-time access to patient worklist, dictation and document templates and patient transcription history while dictating
- Provider-specific documentation workflows include dictation, templates and patient transcription history while dictating
- Simultaneous access to review, edit and sign documentation 24/7/365
- Automatic report routing to referring physicians upon authentication
- Seamless integration to the electronic health record as a narrative report or structured document
- Safe, secure and HIPAA compliant
