

Welcome
to the greenest car wash in town!

- We recycle 100% of our water in a recycling plant.
- 100,000 gallons of rain water collected from our slanted roof each year, stored on site, then recycled into drinking water quality.
- 100% of the building receives natural light saving energy .
- 100% of our electricity comes from off-site wind turbines.
- All chemicals are biodegradable, saving our rivers and bays.
- All of our bricks are local, shipped from Manassas.
- All wood used in construction was certified by the Forest Stewardship Council.
- The average home driveway car wash uses 140 gallons of water, we use just 40 gallons.
- The hand dryers in our bathrooms save 2,000 pounds of waste paper each year (about 18 trees).

ABOUT US
