

It's Just Right.

Presenting a new pillow with DACRON® Dreamessence™ fiberfill.

In the land of pillows, buyers and consumers have had to bear the weight of an uncomfortable market with just two options – micro denier pillows that don't last the test of time or expensive down. But no longer. Now there is a luxurious and lasting option at an affordable price for you and your customers. Pillows with DACRON® Dreamessence™ fiberfill use unique fine denier fibers to maintain the shape and down-like softness you've always dreamt about, without the imposing price tag. While other pillows are too hard or too soft, too basic or too expensive, hypoallergenic DACRON® Dreamessence™ fiberfill is just right.

Contact an INVISTA representative today and give your search for the perfect pillow the storybook ending it deserves.
