

We Believe

- ☞ That animals are conscious beings, capable of thought, feeling, emotion and choice ☞
- ☞ That each animal is an individual with his or her unique needs and wishes ☞
- ☞ That all pets deserve to be pain-free ☞
- ☞ That the principles of human hospice and palliative care are equally powerful when applied to animals ☞
- ☞ That an interdisciplinary team is essential to addressing the needs of pets and their families through aging and illness ☞
- ☞ That quality of life is subjective, best evaluated by the family who knows and loves the animal ☞
- ☞ That there isn't one answer that is right for every animal or every family ☞
