# ClearRelease™

Environmental Friendly  
Construction Products

## The ClearRelease™ Difference

ClearRelease™ was developed by a trucker with 20 years experience that was frustrated by the lack of products that worked to release asphalt from truck beds. Completely environmentally safe and made from all renewable resources, ClearRelease™ replaces diesel fuel to keep loads from sticking.

ClearRelease™ has developed into a family of products including ColdRelease™ and TarRelease™.

ClearRelease™ is safe enough to use full strength, strong enough to dilute 15:1

### ClearRelease™ – Asphalt Release Solution

ClearRelease™ works by adhering to the truck bed surface, creating a barrier between the surface it is applied to and the asphalt, so the asphalt does not stick. ClearRelease™ is safe enough to use full strength, yet strong enough to be diluted up to 15:1. Unlike other products that must be diluted to preserve the integrity of the asphalt, ClearRelease™ is 100% safe for asphalt at full strength.

ClearRelease™ is:

- DOT Approved
- Effective on polymer, rubberized or SMA
- Safe for boots, won't stain clothes
- Easy to clean up with water

### ColdRelease™ - Cold Release Solution

Truckers no longer need to use motor oil, diesel fuel or antifreeze to release loads in freezing temperatures. Spray an even coat into the entire bed and your're ready to load. ColdRelease™ will work in temperatures down to -35 degrees and is cost effective because one application will treat multiple loads.

### TarRelease™ Tar Remover and Cleaner

TarRelease™ is designed to clean tar and asphalt off pavers, trucks, and tools.

- For lighter cleaning jobs, TarRelease™ can be diluted 8:1
- Great for cleaning tar off truck frames and rims

## ClearRelease™ Key Properties

- Cost Effective
- Water Soluble
- Non-Toxic
- Odorless
- Environmentally Safe

## Other Uses/Applications

TarRelease™ can be used to remove bugs, tar, bird droppings and tree sap before they eat away at a vehicle's finish. Pour a small amount of ClearRelease™ on a cotton towel and rub the area gently.

TarRelease™ can be used as a degreaser on engines, transmissions and final drives.

## Product Sizes

### ClearRelease™

- 5 Gallon Pail
- 55 Gallon Drum
- 275 Gallon Tote

### ColdRelease™

- 5 Gallon Pail
- 55 Gallon Drum
- 275 Gallon Tote

### TarRelease™

- 32oz Spray Bottle
- 5 Gallon Pail
- 55 Gallon Drum
- 275 Gallon Totes
