

A contemporary kitchen using a mixture of patterns and textures creates an interesting view.

Getting Started

It's easy to start your kitchen remodel by following these steps:

- Determine the various activities that will take place in your new kitchen
- Write a list of what you like and dislike about your current kitchen
- Collect photos of kitchens or features that you love
- Write a list of your "must-have" products and features
- Call us for a free one hour design consultation to review your requirements and explore your possibilities!

Who We Are

A glamorous modern kitchen with a great entertainment bar.

TANNER DESIGNS LLC

Beautiful Functional Kitchens

TANNER DESIGNS LLC
Santa Clara, California

A large open galley kitchen has space for a large island, lots of helpers and even a seating area for the kids.

Our Process

All of our clients are guided through a simple process of designing the kitchen space, selecting the products and installing the products.

- We meet with you in your home to review your requirements, measure the space and begin the room layout
- Over a series of meetings we finalize the layout and choose cabinetry, countertop and backsplash materials, plumbing fixtures, appliances, lighting and accessories
- We finalize the design creating a complete design package and order the products
- We work with your contractor to ensure the design is executed and installed as we have carefully planned

"I love my kitchen! Cathy made the process so easy and came up with creative ideas to customize the kitchen for our needs! It's just beautiful!"

-S. Palmer

A traditional kitchen with cherry cabinets, granite counter tops and a custom niche in the backsplash.

A small transitional kitchen pairing painted cabinetry with modern elements including a stainless steel apron front sink.
