

What do the stars mean

NABERS Energy & Water

→ for offices, data centres, shopping centres and hotels:

6 stars..... Market leading performance

Best building performance. This building is as good as it gets. It features best building performance through integrated design, operation management and choice of fuel.

5 stars..... Excellent performance

This building demonstrates excellent energy performance due to design and management practices or high efficiency systems and equipment, or low greenhouse intensive fuel supply.

4 stars..... Good performance

This building shows very good energy performance, high efficiency systems and equipment, environmentally conscious design and management practices, or low impact fuel sources.

3 stars..... Average performance

This building demonstrates good systems and management practices, and reflects an awareness of the financial and environmental benefits of optimising energy use.

2 stars..... Below average performance

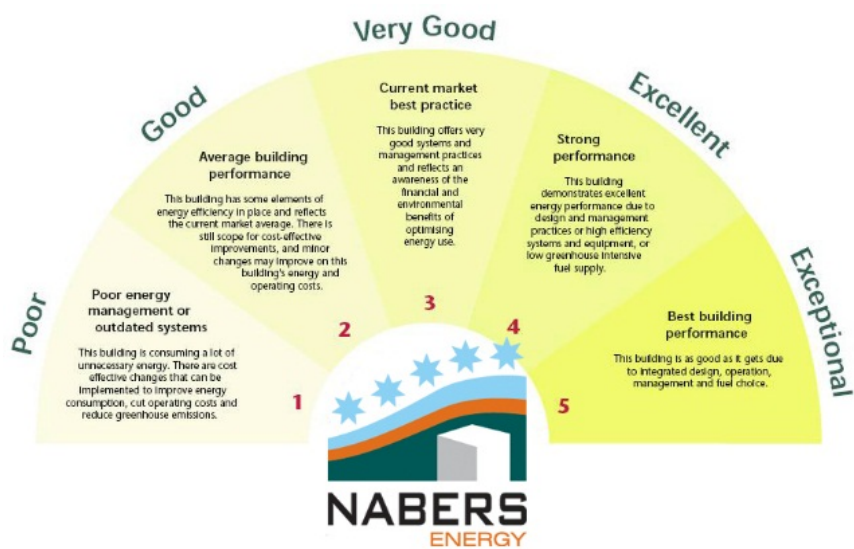

This building has some elements of energy efficiency in place and reflects the current market average.

There is still scope for cost-effective improvement, and a range of changes can improve on this building's energy and operating costs.

1 star..... Poor performance

This building is consuming a lot of unnecessary energy. There are a number of cost effective changes that could be implemented to improve energy consumption, cut operation costs and reduce greenhouse emissions.
