

I am picturing a guy sitting on a stack of books with a book open in hand reading it and looking away from the laptop, and typing on a laptop with the other hand and digital signals leaving the laptop in a stream of 1s and 0s going into a control cabinet or a small factory and parts rolling off a conveyor behind the cabinet or back side of the factory.

DO NOT LAUGH AT MY SKETCH!

INDUSTRIAL GOTS HAVE SAFETY, (IE) HARDWARE, GASSES, BOOTS
