Who is onTop Technology?

We are your one-stop shop for reliable, secure, compliant, cloud-based infrastructure solutions. Together, we review your IT operations and select the right tools and platforms to run your business.

We help control your costs by streamlining IT spend with predictable, smaller monthly expenses, eliminating the need for heavy capital expenses like on-site hardware. We concentrate on scaling your IT and protecting your data, while you focus on growing your business.

We help you leverage the cloud to run your business from anywhere, from any device, with the assurance of better security, HIPAA and PCI compliance, and 99.98% uptime.

At onTop Technology, it all starts with a conversation.

Are you ready to talk about how we can provide a flexible, reasonably priced solution to fit your needs?

“While there are numerous hosting providers to choose from, we found that only OnTop Technology Corp had “above and beyond” personalized service, backed by the integrity of a Tier III certified data center. By partnering with OnTop, we were able to greatly enhance our IT infrastructure.”

Steve Booze, COO, Appointments-Plus.com

Why onTop?

We are really onTop of the cloud. We partner with the biggest names in cloud-based infrastructure, compliance and security so we can offer the right package for your business needs.

There are many reasons to love the services offered by onTop Technology - convenience, price, customizability, uptime - but we consistently hear from our clients that, while they like all that, they stick around because of our focus on customer success.
