

Sign-up Process

Allyviate Sitemap

The wireframe shows a landing page layout. At the top is a navigation bar with the Allyviate logo (a sunburst icon), the tagline "Persist, Share, and Prosper", and a sign-up/login section. The sign-up section includes a "Sign-up" button, an "Email" input field, a "Password" input field, a "Remember Me" checkbox, and a "Login" button. Below the navigation bar is a large central area containing a placeholder for a rotating image, labeled "Image" with a callout number 5. Below this central area is a paragraph of text: "Allyviate is an online, community centric approach to wellness through education, communication, and behavioral management for people with chronic health conditions." At the bottom of the page are three white boxes, each containing a callout number and a placeholder image. The first box is labeled "About Allyviate" with callout 2. The second box is labeled "Community Highlights" with callout 3. The third box is labeled "Sign-up" with callout 4. The entire page is enclosed in a browser window frame with a back button, a search bar containing "http://www.allyviate.com", and a hamburger menu icon.

Page Notes:

- This is the landing page for anyone that enters the URL: www.Allyviate.com
- The page will be very long and have bookmark links to get to the About and Community Posts sections.
- If the person checked "remember me" during their sign-up process, a cookie should be stored to take them directly to their Home Page.

Call-out Notes:

1) Member login & sign-up link

2) About Section - This area contains a graphic and links to the About Allyviate bookmark on the landing page

3) Community Highlights - This bookmark link takes visitors to the display of selected posts and content from members of the community. This will be populated by the Allyviate staff manually

4) Sign-up - These buttons are the same and link to the sign-up modal dialog box

5) Rotating Image - This image should rotate on set time intervals with information about Allyviate

6) Tagline - 30-40 characters long

7) Remember Me - This checkbox can be selected if the user wants to be logged in automatically next time they visit the site. A cookie will be placed on their system to facilitate this.

8) Description text - This short one-liner describes Allyviate

About Allyviate 4

1

Members of Allyviate's community know how life changes when we have chronic medical conditions. Our members know how grim things can be. And our community also knows how bright things can become.

Although Allyviate does not replace your other medical services, it will compliment them. People who use Allyviate become more motivated and hopeful. They learn about all the research-based strategies they can use to maintain the gains they've made with their chronic disease, while also preventing stress, or mood difficulties, which also arise from time to time when people live with chronic medical conditions. As members of this online community offer help and seek help from one another, they are also exposed to health information which educates and motivates users to live the most satisfying lives they can live with their chronic health condition. Allyviate's wellness platform helps users connect with other users like you to share support, information, and ideas. By checking in with you about how you are doing and what you are doing about your health, we improve

Short Bio of the person helps visitors know who is behind the scenes

Team Member 3

Name

Short Bio of the person helps visitors know who is behind the scenes

3

Page Notes:

- This section of the landing page will have a description of the Allyviate Concept, and it needs to automatically scroll down to this point if the user clicks on the about icon above.
- The section will also have team member pictures and short bios.
- The normal footer will be at the very bottom of the landing page.
- The header remains at the top of the visitor's window while scrolling down and continues with the user to the bottom of the page.
- Links or some other navigation to the other sections on the page should be added somewhere on the bar or on the side.

Call-out Notes:

1) Text - This describes the Allyviate concept

2) Team Member Photos - The pictures should have a short bio below them

3) Scroll Bar - This view is after the user has scrolled down the page. The top of the page should be the rotating image and book mark links of the landing page.

4) About Section - This needs to be below the bookm mark links and should be flexible so that the text can be long or short, but the page will shift down or up to compensate.

Selected Posts From Allyviate Members

These posts were written by members inside of the Allyviate community. They are honest representations of the kinds of interactions going on and we are excited that the authors have allowed you to view them outside of the safe community environment.

Feel free to read through them and see what you think. These are just a handful of the many posts from members that have the same struggles and triumphs over their health conditions that you might be here for.

Enjoy!

When I was young

I used to love riding my bike when I was younger. When I got RA, I felt like my life was over. But now that I am on methotrexate, I have a bit more flexibility even though the side effects are pretty severe. They seem to be not as bad as the RA flares that once...

Page Notes:

- The selected posts section is intended to give each visitor a taste of what is behind the curtain.
- The posts will not contain any personal information and the visitors cannot comment on the posts until they sign-up.

Call-out Notes:

- 1) Selected posts - These posts would be selected by Allyviate staff with the permission of the author and manually entered on the page.
- 2) Read More - This link would pull up a modal box with the full article similar to "Home Page (Sugg. Articles Modal)" but without the comment and rating boxes.
- 3) Text - This text is meant to explain and augment the selected posts.

Page Notes:

- The selected posts page is intended to give each visitor a taste of what is behind the curtain.
- The posts will not contain any personal information and the visitors cannot comment on the posts until they sign-up.

Call-out Notes:

- 1) Header - The header should continue to remain at the top while the user is scrolling down the page.
- 2) Read More - This link would pull up a modal box with the full article similar to "4-Home (Modal)"
- 3) Footer - Links to the other options available on the landing page including the contact us, secondary navigation for bookmarks, and other links that can be added later.

Page Notes:

- The users need to clearly understand that they can choose between social media login options and the email icon. If the icon is not clear enough, then the word "email" should be used.

Call-out Notes:

- 1) Login Method - Users will select a validation method. The choices are between email and other social media applications.
- 2) Next Button - This button will be disabled until the user selects a log-in methods. If a social media icon was selected, the validation process will come next before choosing a username and password.
- 5) About Allyviate Link - This link takes the users to the About page.

Page Notes:

- If the visitor chooses email as their preferred login method, they will receive this modal next.
- All of these form fields are required

Call-out Notes:

- 1) Email form - Users must enter a valid email for the email confirmation message to be sent.
- 2) Username - The username field should be validated to ensure that users are not selecting one that has already been chosen.
- 3) Create Password - Passwords should be validated using 6 or more characters and the passwords should match.
- 4) Question - This allows visitors to select whether they have Rheumatoid Arthritis or not.
- 5) Join Us Button - This button will be disabled until all three steps are completed. It will take users to their home page if they have RA or to a message dialog box if they do not have RA. The IP address should be recorded if someone answers no so that they cannot just push the back button and change their answer.

The screenshot shows the Allyviate Home Page in a web browser. The browser address bar shows <http://www.allyviate.com/home>. The page layout includes a header with the Allyviate logo (9), navigation links for Home, Community (6), and Portfolio, and a Sign out button. The main content area is divided into three columns. The left column has two sections: 'Members I'm Following' (4) listing Beth and George, and 'Members Following Me' (5) listing David, Allison, and Mary, each with a 'Follow' link. The middle column is the 'Guide' (2) section, titled 'Here's what's next...', containing a progress bar, a paragraph about understanding symptoms, four radio button options for agreement levels, a 'Next' button (3), and a 'Skip' link. Below the 'Next' button is a help icon (8) and a link 'I'm bored with this...'. The right column is the 'Check-in' (1) section, titled 'Have you checked in recently?', featuring two sliders for 'Mental Outlook' and 'Physical Functionality', and a 'Comments' text area. The footer (7) contains navigation links for Home, Community, and My Posts, a link to the Terms of Use & Privacy Policy, and the copyright notice '(c) 2013 Allyviate Health Inc.'.

Page Notes:

- This is the Home Page for every Allyviate member

Call-out Notes:

- 1) Check-in Field - Users will be prompted to check in each time they log on to keep track of their mood and physical status as well as any comments that they have for the day. The data from here is inserted as a line into the same database as all the user's other entries, posts, and questions answered.
 - 2) Guide Area - This area is the guided section where questions, exercises, and articles will be presented to users
 - 3) Next Button - Clicking this will take users to the next question, exercise, or article/post
 - 4) Members I'm following - This shows the members I am following that have had recent activity
 - 5) Members following me - This shows members that are following me that have viewed my posts recently
 - 6) Header Navigation - Clicking the community or My Posts links will take users to those respective pages
 - 7) Secondary Navigation - The footer will contain secondary navigation for the website's pages
 - 8) Help button - The help button should bring up a modal dialogue box that shows instructions for the current page and available options
 - 9) Allyviate Logo - The logo should be linked to the user's home page

Home [Terms of Use & Privacy Policy](#)

(c) 2013 Allyviate Health Inc.

Page Notes:

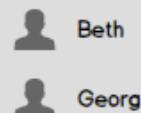

- The exercise format is used when the Allyviate staff want to prompt the user to write something or perform a specific action.
- The format will always contain a set of instructions or summary, a place for them to title their article or post, a main body form, and a set of tags.
- There can be multiple tags per article.

Call-out Notes:

- Writing exercise - This area is where the user will be prompted to write about something by the Allyviate program administrators or staff
- Title of post box - The user will self-title their posts. This is a required action and the next button should not be available until they assign a title.
- Body of post - Users will input their text and post content here
- Tags - Users will select one or more tags that have been established. Users can also choose to propose a new tag for system admins to approve
- Skip button - This option should be small and out of the way, but still available if the user does not want to answer the question
- Next button - The user must select a tag option, assign a title, and write something in the text box before the button is enabled

Page Notes:

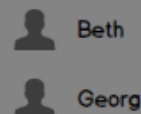

- Other users will more than likely already have completed the same exercise that this user just finished. Their posts will be inserted here.
- The goal is to get the Allyviate members interacting with their peers and gaining insight from reading other's perspective on the task that they just completed.

Call-out Notes:

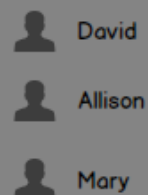

- 1) Selected Posts - The posts/articles selected for users to read will be in the same format as the blog posts, but without the author's username or the popularity statistics.
- 2) Read More Button - Clicking the read more button will bring up a modal box with the article.
- 3) Next Button - The next button will be unavailable until one of the selected posts is clicked.
- 4) "Skip" Button - If none of the articles/posts is interesting to the user, they can be skipped. This skip should be recorded as the user not liking the posts.
- 5) Pop-up Note - This notifies users to click a post before proceeding. It should only be shown to a user the first time they view this page on their first log-in to Allyviate.

When I was young 1

I used to love riding my bike when I was younger. When I got RA, I felt like my life was over. But now that I am on methotrexate, I have a bit more flexibility even though the side effects are pretty severe. They seem to be not as bad as they used to be, but I am still worried about how they might affect me down the road.

When I was young, my dreams of playing sports professionally were cut short, and my soccer playing stopped, but I found other activities to fill my time. The energy needed to function each day means that I have to get lot's of sleep and take it easy when my joints start hurting or my fingers swell. Thank God that I can still be active though. I still go for walks and keep traveling like I always hoped that I could.

2

Please select...

- I can relate to this person
- I somewhat like the article
- The article was OK
- I did not like the article
- I am unable to relate to this person

☐ Follow this member 3

Like this?

4

Page Notes:

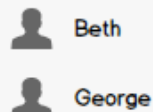

- The multiple options on this page allow a user to like the post, follow the author's activity, and rate how they related to the post itself.
- If the entire article does not fit on one page, a scroll bar should allow them to go all the way to the bottom.

Call-out Notes:

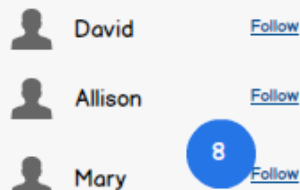

- 1) Selected Posts - The posts/articles selected for users to read will be in the same format as the blog posts, but without the author's username or the popularity statistics.
- 2) Rating Drop-down - The drop-down menu will be available for users to evaluate what they thought about the post.
- 3) Follow This Member Checkbox - The user can select to follow this member after reading the post. Following a user will make that member's posts list higher in the community feed.
- 4) Modal box - The rest of the page should be greyed out using the modal popup box.

Thanks for checking in! ✓

Mental Outlook

Physical Functionality

I am not able to move much today, but my outlook is better

Page Notes:

- The community page gives members a feed of posts from others.
- This is the primary mode of communication since there are not status updates or messages in the MVP.

Call-out Notes:

- 1) Check-in Field - On this page, the user has checked in and is feeling optimistic under the mind slider bar, they have rated their physical functionality using that slider as well, and they have added comments in the comment section. After ten minutes, the box will show "Has anything changed?" while showing their previous check-in evaluation.
- 2) Posts Feed - This is the section where articles/posts by users will be displayed. The most recent post will be at the top as the default sorting scheme.
- 3) "Thumbs up" button and counter - This option is always available for users to give positive reinforcement to good posts/articles
- 4) Read More - Users click this link to read the rest of the post
- 5) Post Sorting - Posts/Articles can be sorted by clicking these buttons. The sorting parameters are by date, popularity (number of thumbs up), or by the number of comments that an article has generated
- 6) Name and Title - The author's name and the post title will be located here
- 7) Scroll Bar - The user can scroll down to see more posts
- 8) Other members can be followed by clicking this link

Mental Outlook

Physical Functionality

I am not able to move much today, but my outlook is better

Page Notes:

- This is the page that would be shown if someone clicks the read more button from the community page.
- The page would scroll down to include the entire post and all the comments. Comments can load asynchronously if needed, but this is not a solid requirement.

Call-out Notes:

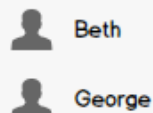

1) Comment Box - Users can comment on anyone's post regardless of whether or not they follow them. These comments should be recorded in the commenting user's chronological database.

2) Rating Drop-down - The drop-down menu will be available for users to evaluate what they thought about the post. It is the same from 4-Home Page (Article Modal) page.

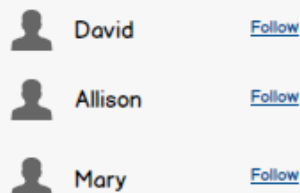

3) Old Comments - Standard blog comment format

Page Notes:

- This page displays the user's own articles and posts

Call-out Notes:

- 1) My Posts Tab - This page has two tabs. The first is for the posts that the user writes. The posts can either come from the Ally process or from writing a new one directly from here.
- 2) Activity History Tab - This tab shows all of the previous questions that the user has answered from the Ally process on the Home Page
- 3) Create New Post Tab - This tab allows the user to write an article or post without being prompted by the Ally process.
- 4) My Profile - Any personal information about users is located here and can be expanded using the "see more" button
- 5) Read More/Edit Links - These will each bring up a modal box that allows the user to read their full post or edit it respectively. The form for editing should look the same as the original entry form. (Click the Create New Post tab to see the form structure)
- 6) Check-in Panel - Notice that the check-in panel has refreshed since the user let and is now waiting in case something changes during the user's session.

Page Notes:

- The purpose of this page is to give members an insight into their own activity on the site.
- The page consists of a query of their own database that brings up only a few pieces of information.
- In the future, charts and visualizations will be added to this page.

Call-out Notes:

- 1) Date/Question - The date the question was answered and the question itself are presented here.
- 2) Answer - The user self-selected or entered answer is displayed for the user
- 3) Update Answer Link - The user should have the opportunity to update their answer. The original answer will be retained as another line with the current date and original question text.
- 4) Sorting Tool - The user can either sort by date to see the chronological order that they answered the question, or they can sort by question to see if the same question has been answered more than once and any related trends. This will eventually encompass a data visualization to show trends in answering questions.
- 5) Note* - Time-based answers will not be eligible for updates. They will instead eventually be updated automatically using the time stamp and answer given.
- 6) Check-in History - Each time a check-in is submitted it will be entered into the question history tab of the user's portfolio.

Page Notes:

- This page lets a user add or remove things from their profile
- The user's profile will be empty until they start adding things.
- One of the tasks given in the guide section will be to add items to their profile.

Call-out Notes:

1) Profile Picture - The user can upload a new picture here.

2) Age/Gender - These items cannot be changed once added. They can be removed from the profile though.

3) Editable forms - The hometown text box here can be changed or the user can click on remove.

4) Add Another Component - This drop down will add more items to their profile and also allows them to name their own form component.

5) Finished Button - Once the user is finished editing their profile, they can click this and the fields will save the information.
