

uPVC Windows and Doors
will tick all of your boxes:
They have amazing
strength and durability

- >> You will never be required to paint, stain or maintain them
- >> They will not break down and rot like timber
- >> If you give us your ideas - we will make your ideas into windows and doors
- >> Standard sizes are a thing of the past - we will make them to measure
- >> Our prices are slightly above aluminium and below timber, thermally broken aluminium and timber composite - affordable!
- >> They have amazing insulation values
- >> They help to keep the noise out or in
- >> The tight seals of PVC window and door profiles and the ease with which they can be fabricated for double and triple glazing make PVC an excellent choice in energy efficient buildings.

“ I have recently had the majority of my aged windows replaced by Solace Creations. The old windows were from 1947 and allowed air in around the outside as well as through the very thin glass. They were stiff and brittle and in need of lots of paint. Solace replaced them with uPVC double glazed low e double hung Artisan Windows from AMSCO. Our house is quieter and much more snug. The windows are simple to clean and will never need painting. Being in a Heritage Protection Area was no problem and the change from the old to the new was barely noticeable, except for the increased amenity! The installation itself was quick and fuss-free. The workmen were polite and tidy. Karen Fisher was helpful, thoughtful and very efficient throughout our (slightly extended) interaction. She and her team made sure that every detail was correct before ordering the windows and, as a result, everything went smoothly. Overall the experience was really, really good.”
