SHARK RS

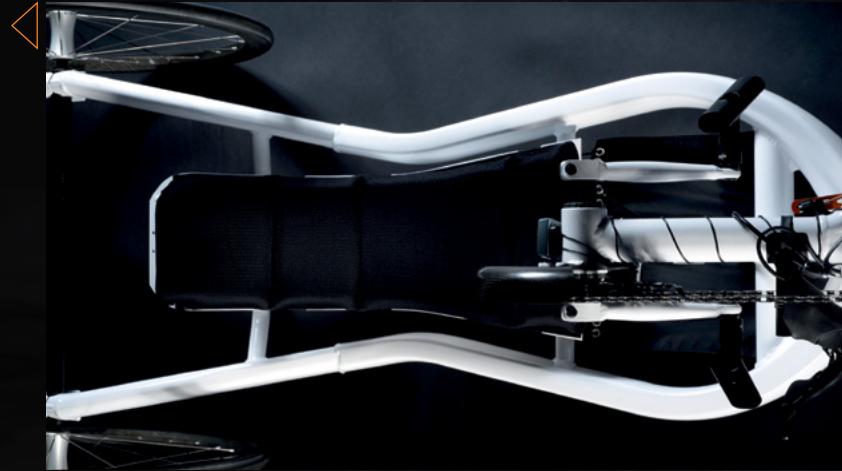

SHARK^{RS}

Champions Choice. Made to win.

The new innovative frame design offers more free moving space and ergonomic and sets a new standard regarding driving performance. All this combined with lower weight. The new Shark RS is designed for future champions. Made by Quickie®.

Weight reduction combined with design improvements. Best design in class.

The innovative performance backrest guarantees maximum ergonomic. Independent adjustable back elements for enhanced performance.

The new rear axle fixation with forged parts offers highest stability with lower weight. Axle tube available in aluminium or carbon.

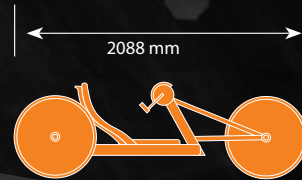

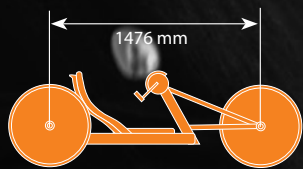

New DT-SWISS carbon wheels. Unique performance combined with an excellent design.

The new front fork is the masterpiece of the Shark RS. It offers lighter weight and higher rigidity.

SHARK RT

QUICKIE
Live without limits.

SHARK RT

Enjoy biking. Feel the air flow in your face.

The Shark RT has been developed for hobby bikers and semi-professional athletes. It offers the same performance as the Shark RS but with more adjustability and flexibility. The new lightweight design makes the Shark RT ideal for comfortable biking.

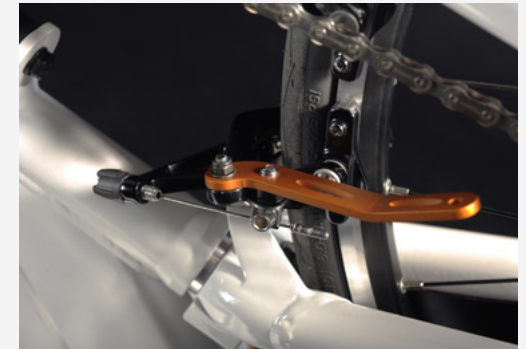

The connection between frame and fork is extremely stiff. That gives more energy for propulsion and the effectivity of the bike is much higher.

The unique lightweight design of the axle ensures that the rear wheels can be exchanged very easily.

New lightweight parking brake with improved functionality. On top of that a fantastic look.

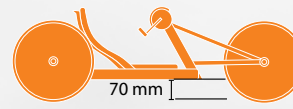

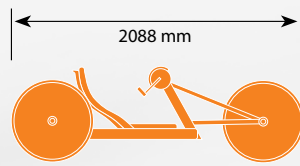

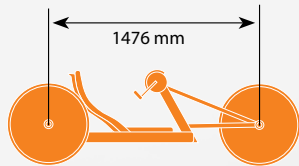

Integrated lower leg length adjustment for individual user needs. Simple to adjust and very clean look.

The new front fork can be adjusted in several positions in height as well as in depth. This gives more flexibility for all user.

SHARK RT
