Zippie Pulse Kidz™

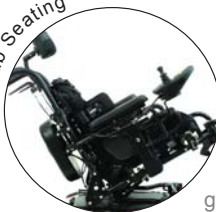

The Zippie® Pulse Kidz™ provides comfort and maneuverability in a paediatric rehab power chair. The new Pulse Kidz features the proven performance of a Z-Bop powerchair, Zippie TS seating system and now featuring P+G electronics.

# Zippie Pulse Kidz Paediatric Power Wheelchair

The rehab features you want in a compact power chair

Rehab Seating

The Pulse Kidz provides manual or power tilt, rehab seating and specialty controls in a smaller, lighter, highly maneuverable package. 30 degrees of manual tilt or 50 degrees of power tilt, growth features, fully adjustable seat depth and seat-to-back angle, and a low 15.5-inch seat-to-floor-height create versatility for today and room to grow tomorrow.

Easy To Use

The Pulse Kidz is equipped with P+G electronics, which offers customisable driver control options which range from a simple VR2 controller as standard to an advanced, easy-to-use RNet control system. Pulse Kidz is compatible with infrared, bluetooth mouse emulation and ECU modules with the RNet upgrade. Interfacing with educational AT has never been easier.

Manual Base

The Pulse Kidz ships standard with either candy red or gloss black coloured shrouds plus a choice of special additional Zippie colours: pearl pink and candy blue. This range of selection provides the ultimate in personal choice. An optional manual carrier makes transport easier and attendant-friendly.
