Office/Showroom: Monday-Friday 8:00-4:30

We offer : Shower pans
Shower and tub enclosures
Vanity tops
Bath tubs
Solid Surface Kitchen and bath counter tops

I would really like a section that focuses on our shower that replaces a standard fiberglass or steel bath tub. That is 5 foot and provides the drain on the end that aids in not having to move the drain. Files (fiberglass shower Before.jpg , shower with end drain After.jpg)

Tops And Tubs Inc. Has been providing the finest quality cultured marble products to the East Texas and Dallas areas for over Thirty years.

Scrubbing and sealing shower tile and grout lines is a hassle and time consuming. No matter how good it looks when you install it, tile leads to maintenance headaches down the road. Mildew loves caulking and grout seams, and the more tile that you have, the more work it is to keep clean. If you're looking for an easier solution, try upgrading to a cultured marble surround. With the sleek look and polish of natural marble, you get a modern-looking shower that is easy to maintain at a fraction of the cost, installed in most cases in less than one afternoon.

Cultured marble is longer-lasting than acrylic shower and bathtub surrounds with more color options. One piece acrylic shower liners have become a quick and easy solution for bathroom renovations, but many end up separating, cracking, puncturing or bubbling within a few years. Our cultured marble products are custom manufactured, one at a time, by skilled craftsmen. The result is a sturdy product that looks and feels like stone, and lasts just as long. And because we cast every product right here in our own shop, we can tailor styles, sizes and colors to fit your needs.
