

COLOR: We love the color scheme of this print. The **blue**, **green** of the flower base, and **maroon** is what we are after (the pink and red play that role in this print). There are also the gold flourishes with the fern which we like, but is not necessary.

FONT: We love the fluidity of this font and how the 'f', 'l' and 'h' flow and intertwine. We would like to have 'beflourish' all lower case.

FONT: We love the vintage look of this monogram and we also like the idea of something similar to be our “short logo” for needs where the full text version is too long.

LOGO ICON: We really enjoy the bee pictured and would like to see that in our logo – long/short or both. We like the acanthus leaves but not the crown.
