

*The G4 Countertop Model Hot and Cold is equipped with every feature of a floor-standing cooler, yet it fits easily on top of all countertops. The G4's black and graphite color adds a modern style to any home or office.*

**Filter System - Available in:**

**2 Stage Ultra Filtration**

Stage 1: 5 Micron Sediment Filtration

Stage 2: 5 Micron Carbon Filtration

or

**3 Stage Reverse Osmosis**

Above 2 stages plus

Stage 3: 50 GPD RO Membrane

**Specifications**

Dimension: 11"W x 18"D x 16"H

.5 Gallon hot tank

.5 Gallon cold tank

Water connection: 1/4" tubing

Weight: 42 lbs. (dry)

Power supply: 120V/60Hz

**Features**

Built-in cup holder

Built-in filtration system

Simple and easy to use control panel

LED indicator panel

Safety button for hot tank

Electronic water shut-off system

Type T304 stainless steel hot tank

Adjustable cold temperature

Power switches for hot/cold tanks

Model G4CT  
Global Water

PURE, ENDLESS WATER

866-289-7518

## 2 Stage Filtration or 3 stage Reverse Osmosis Filtration Technology

### Stage 1

#### 5 Micron Sediment Filter

The first stage is a 5 micron Sediment filter that helps improve Sediment such as sand, rust and silt that is present in most municipal water sources.

### Stage 2

#### 1 Micron Granulated Activated Carbon Filter

The second stage of filtration is a 2 micron, granulated activated Carbon filter. This filter uses an advanced Carbon technology to remove hundreds of cancer-causing constituents such as pesticides, insecticides, petrochemicals, M.T.B.E's, PCB's, defoliants, and benzene.

Or

### Stage 3

#### Reverse Osmosis Technology

The 3rd stage utilizes Reverse Osmosis technology, which removes any molecular compounds smaller in size than water molecules. Such compounds include salt, manganese, iron, fluoride, lead, and calcium.

Available options:

Add Nano Silver Carbon Filter.

Upgrade to 180GPD Membrane.

Filter life 2500 Gallons or every 6 months

Replace (RO) Membrane every 3-4 years
