

### Proven quality

Technically exceptional performance data of Varano trench heating and convector radiators have been confirmed during independent tests provided by **Centrum Stavebního Inženýrství Prague, Technický Skušobný Ústav Piešťany** and **Deutsches Institut für Bautechnik in Stuttgart**. The trench heater and convection radiator from Varano have been designed for using in domestic or light commercial buildings, whereas such buildings do not produce any negative corrosion influx due to aluminium, copper and steel.

## Ecological thinking!

We are an environmentally friendly company and care about the environment during the production process. The main goal of our company is to build a leading position in the innovative heating market and proven scientific research of the economics of our heating system brings savings of up to 20% of the energy needed for heating. These savings mean, less effect on the environment via reduced greenhouse gas emissions. We meet the strictest environmental standards, both during production and the subsequent use of our heaters.

## About the factory

Verano is a manufacturer of innovative trench, free-standing and wall-mounted heating systems as well coil fan systems based on our own original scientific research and patent. VERANO heaters are manufactured in Poland, in our fully automated, modern production plant built completely from scratch. Our factory is based in Lublin, about 100km from the eastern border of the European Union.

## About people

We are a family-run company. We oversee all stages of design, development, production and distribution of our radiators. Our employees are creative, enthusiastic young people but are also proven staff with years of experience who enjoy their work and are proud of our innovative products made from the highest quality materials. The ideal subdivision of labour between the management staff and employees makes our collectively coordinated actions

translate into customer satisfaction. In addition, our company coordinates with many companies – heating contractors – which provide professional support and assistance from the design stage right up to system maintenance of installed systems. Thanks to such contractors we can be proud of our products. Joint professionalism and care for the interests of our clients give Verano-konwektor heaters its well deserved reputation.

## Meet us!

Our contractors can find us at all the biggest national and international trade shows and their accompanying events. It's the perfect time for us to present our wide range of convectors. In specially designed boxes, you can compare our convectors and speak with our merchants about the best possible solutions for you.

We have also prepared a special VERANO ON TOUR showcar, in which to we can talk about and present our products in a relaxed, comfortable atmosphere. Stay in touch!

Find us on Facebook, Twitter, Google+ and our YouTube channel.

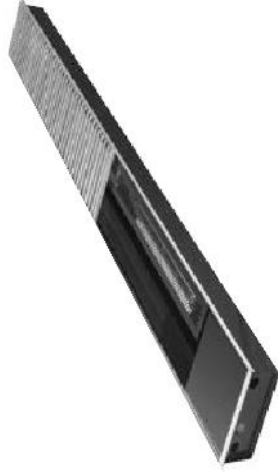

### Trench Heater. Type VK15

The Verano Type VK15 trench convector heater is a perfect source of heat in places with large expanses of glass such as wide windows and terrace doors. Our heaters may be the main source of heat or may complement other sources. The „soul” of the convector is an aluminium-copper heat exchanger within in the trench. The only visible element is an elegant grille matching the surrounding floor.

### Trench Heater fan assisted. Type TURBO VKN5

The convector provides even temperature and natural air circulation and also prevents condensation from appearing on large glass surfaces. Thanks to Verano-konvektor silent fans, this small convector is extremely efficient. The small depth of the trench allows the heaters to be place in the floor of any storey.

### Climaconvetor. Type CVK2, CVK4

In places with large external-facing glass partitions that cause heat loss in winter and gains from the sun in the summer, VERANO CVK climaconvectors are ideal for heating and cooling. CVK floor fan coil units provide proper temperature and optimum climate in both summer and winter time.

## Free-Standing Heater

The Verano free-standing convector is a perfect solution for those with special aesthetic needs. The heater can be match ideally in rooms where traditional wall-mounted heaters are impractical or impossible. The flush profile of the cover makes it an excellent heater for all types of living spaces. The free-standing Verano convector is the quintessence of elegance, a guarantee of the highest standards and outstanding performance.

## Wall-mounted Heater

The Verano wall-mounted heater matches perfectly with every room. This classical heater is designed for offices, hotels, apartments, but also for public spaces. The latest heating technology and solutions used in their production make the heaters respond quicker to changes in the parameters of the heating agent and temperature fluctuations within the room - providing proper thermal comfort.

## Decorative Heater Deko

The new line of decorative VERANO heaters is a complement of our achievements to date. Having decorative heaters makes everyone an artist. Individual housing arrangement gives unlimited possibilities, and for those undecided when buying heaters, VERANO has prepared raw grilles so that the casing can be replaced to match the style of the room after the apartment has been furnished.
