

Individual screen usage description (for getting the broad image what it does)

All relevant information is noted, the rest can be ignored

It's all about making the design, because current one is ugly

Icons are usually not required (except where noted),
but are beneficial towards choosing the winner ;)

Most important screens (design will be chosen depending on them)

Shopping List

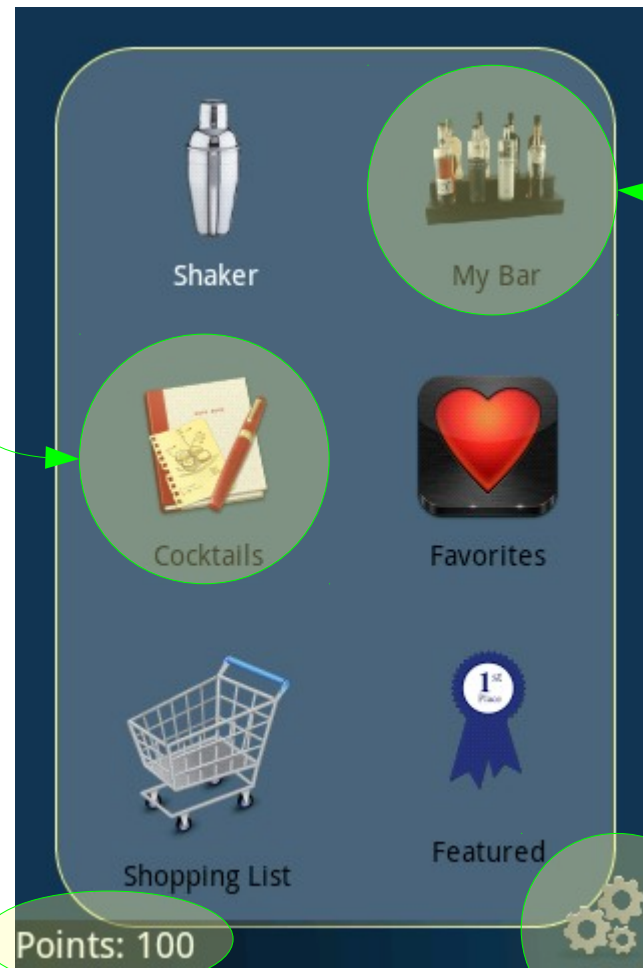

Featured

Points: 100

On this screen, all icons are needed!

Takes you to collection of all available cocktails

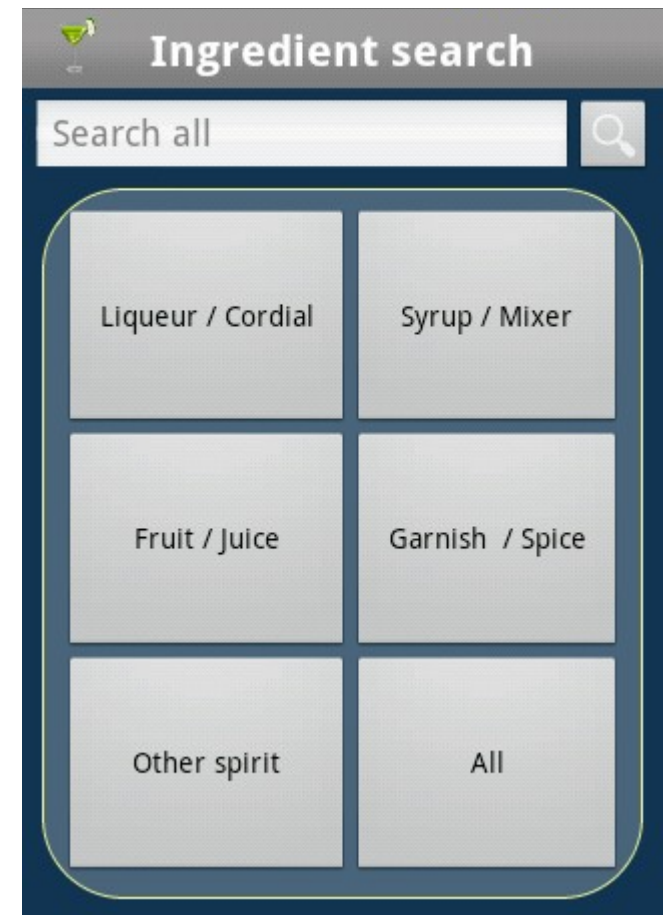

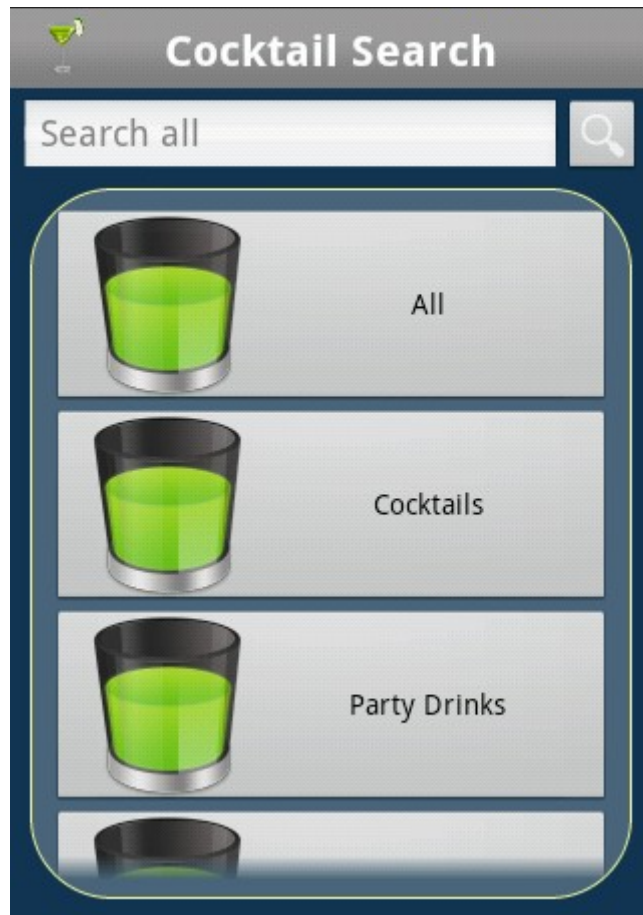

Takes you to collection of drink ingredients you have at home.

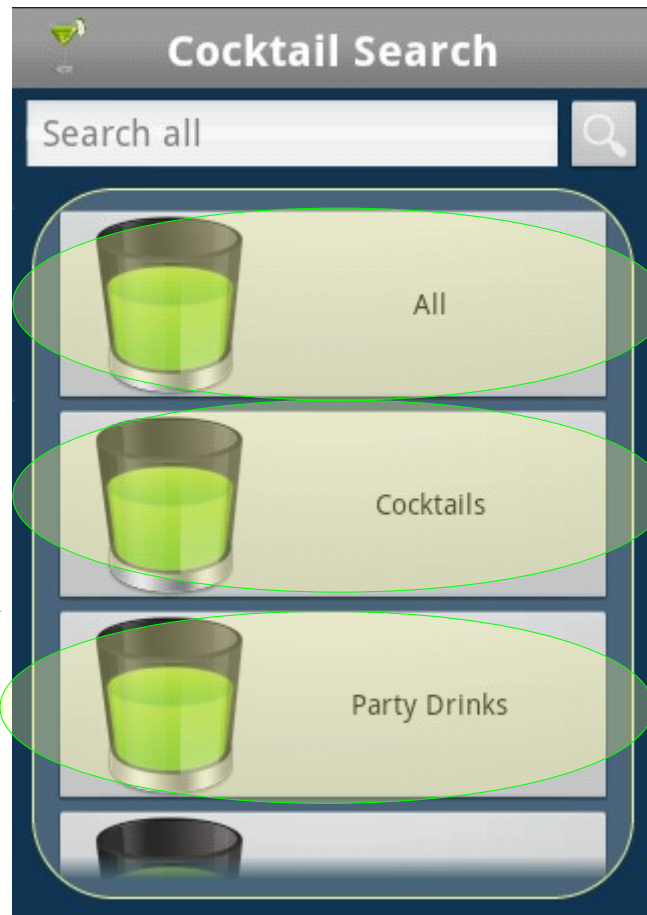

When adding an ingredient, shows a list of all ingredients

Acquired points indicator (gamification)

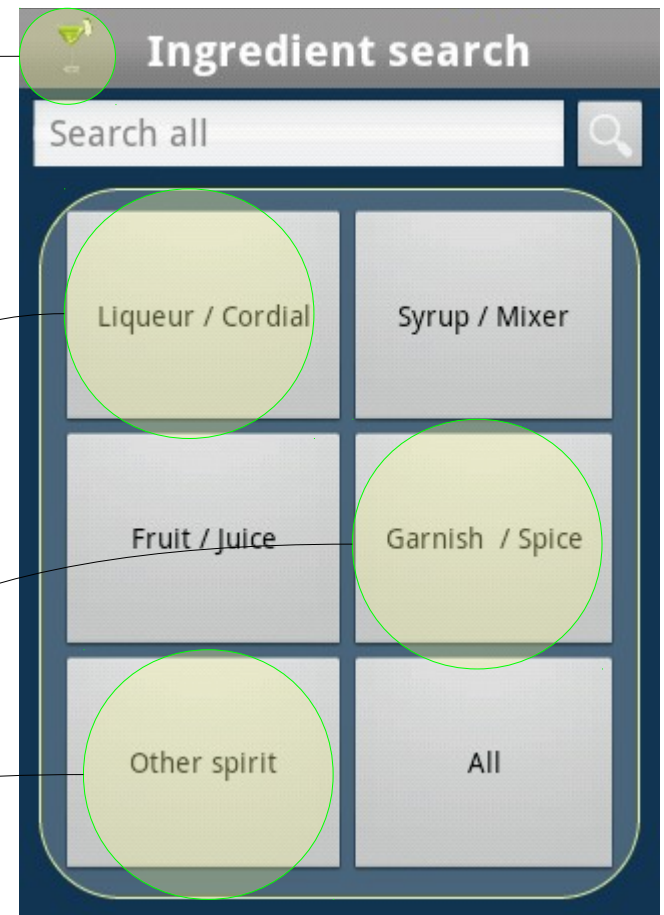

Settings accessible from here

Two layouts given as an example (list vs grid). They should be the same. Buttons are categories, they also have an icon (not required in design, but keep it in mind)

Takes you back to mainscreen. App icon, not required.

Buttons for displaying cocktails/ingredients in selected category only

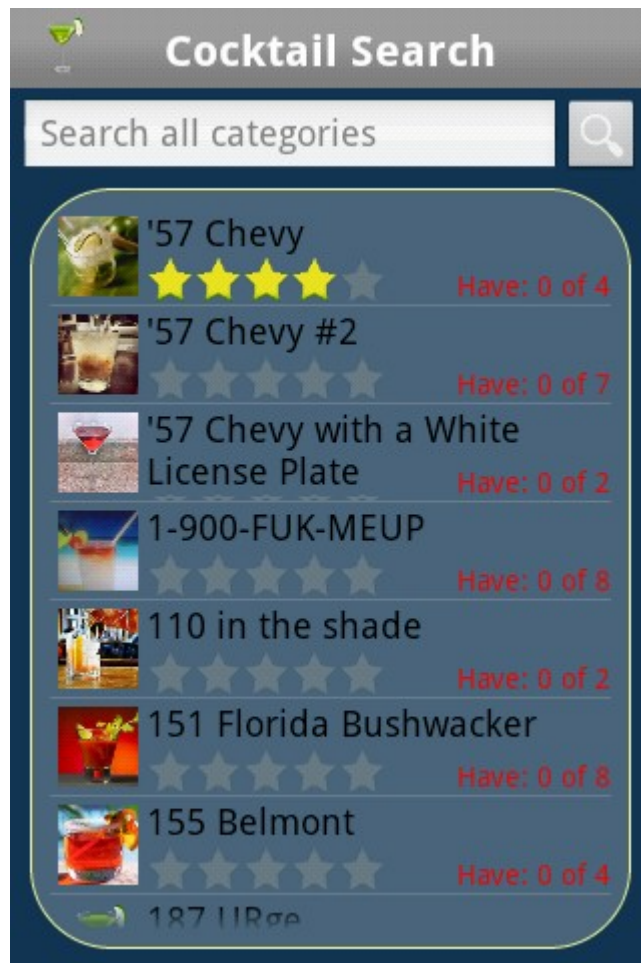

Two layouts given as an example (list vs grid). They should be the same at the end.

6 categories in both screens:

Cocktail: All, Cocktails, Party Drinks, Shots, Milky Drinks, Other

Ingredient: All, Liqueur/Cordial, Syrup/Mixer, Fruit/Juice, Garnish/Spice, Other

Icons not required.

Two screens, the same but the right one has only some stuff removed.
I will explain only the left one

No explanation needed

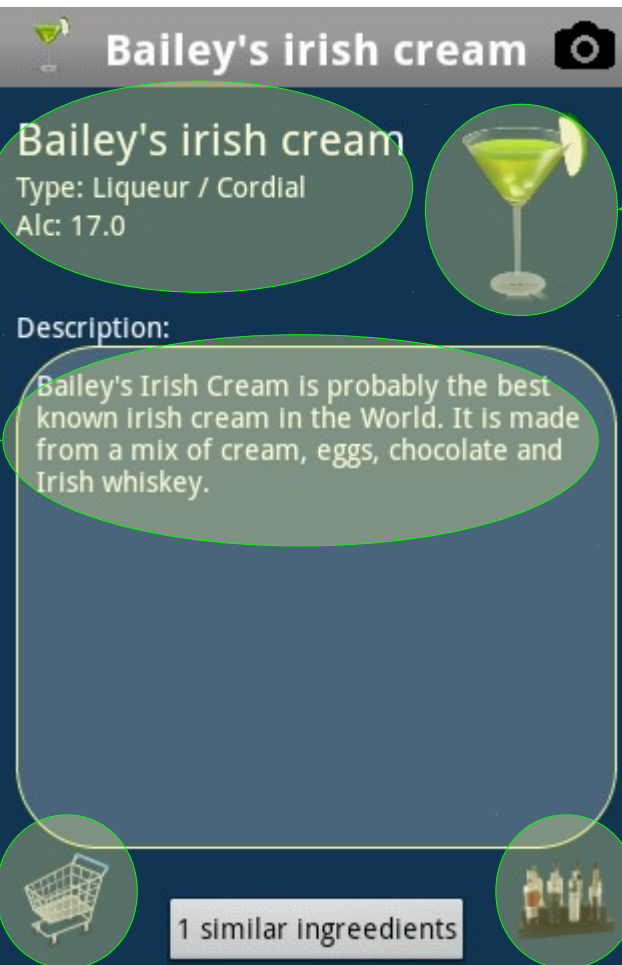

Image of this ingredient

Description, usually has this much text

Adds the ingredient to your shopping list (you want to buy this ingredient)
Icon is the same as on the main screen (or simplified version of it, e.g. silhouette)

Adds the ingredient to your bar (you already have this ingredient)
Icon is the same as on the main screen (or simplified version of it)

Pull up to get clickable list of ingredients which are similar to this one.
Disregard the typo :)
Depending on the design, only button can move up, or also shopping list/bar button can be included in some sort of footer.
Icon needed (or complete footer design)
