### **Internet Exposure to the MAX**

Target marketing, search engine optimization, social media and keyword research are just a FEW of the things we do here at Choice Jacksonville Realty to get your property in front of as many buyers, sellers and real estate professionals as possible.

Our dynamic Customer Relations Management system not only captures information from buyers searching the web for homes for sale but also keeps me in daily contact with them so a buyer is never lost.

### **Buyer Lead Capture is KEY**

A recent MIT study showed that REALTORS® who contacted consumers who are inquiring about homes online within the first 5 minutes of registration have an astronomically higher likelihood of converting that inquiry into a closed sale. Studies also showed that 80% of buyers did business with the FIRST REALTOR® that they spoke with.

At Choice Jacksonville Realty we have cutting-edge systems in place that constantly put buyers searching the web in front of your home. When you choose me to list your home for sale, you can rest assured that I will contact each lead immediately and maximize the exposure to serious buyers.
