fastening system on base

## Ranch King Horse Stalls

Our horse stalls are built with 1-5/8" x 16 gauge tubing and use durable 1/4" puck board (high density poly) on the bases.

| DESCRIPTION                                 | PRICE     | WEIGHT Ea. |
|---|-----------|------------|
|   |           | In Pounds  |
| 1 5/8" x 16 ga. 1/4" puck board on the base |           |            |
| 9.5' wide x 7' high Front w/ Gate           | \$ 147.68 | 209        |
| 9.5' wide x 7' high Panel.                  | \$ 136.85 | 187        |

Straight wall design eliminates wedging and allows cattle to have free movement forward. This chute has a self-catching, adjustable headgate and comes as left or right.

Bottom doors drop down for easy access to hooves. Side bars are removable and can create either large or small access openings to the animal.

Both sides move in when squeezing and push the animal forward to reduce neck pressure.

## Ranch King Cattle Squeeze

| DESCRIPTION    | PRICE     | WEIGHT Ea. |
|----------------|-----------|------------|
|                |           | In Pounds  |
| Cattle Squeeze | \$ 977.00 | 1300       |

# RANCH KING Cattle Guards

(Texas Gates)

| DESCRIPTION                      | PRICE       | WEIGHT Ea. |
|----------------------------------|-------------|------------|
|                                  |             | In Pounds  |
| (Texas Gates) 20' x 8' - 2500lbs | \$ 1,162.00 | 2500       |

Our cattle guards come in 96" road lengths x 20' road widths. Double sill gates are for soft ground, single sill for firm ground, no sills are for placement on concrete. Our cattle guards come with wings or a break-a-way 2-7/8" diameter posts for affixing fence wire lines and are compatible with our gates. Our cattle guards also come with smooth ride bars.
