## Cut the Hidden Cost of Printing

Independent studies show that organisations spend between 1- 3% of their total annual revenue on printing and generating documents

Our aim is to improve return on investment, reduce operating costs and simplify the supply and maintenance of your network printers and copiers

HOW:

By consolidating all printers, MFD's, Photocopiers and faxes under a centralised management agreement and controlling the environment, we are able to provide cost savings that are real, tangible and significant.

Select uses customised alerts, so when a toner gets low or a service is required, an automated request is sent to us advising location, device and what is required.

Move UP

## LANIER select copiers

We provide a professional analytical approach to reviewing the current printing infrastructure of an organization and providing a more cost effective, streamlined solution
