WonderGel Original Seat Cushions are protected by U.S. Patents 5,749,111, 6,026,527, 6,413,458, and 7,060,213.

## **Why WonderGel?**

Wondergel is the most advanced seat cushioning material available today. Made from an ultra-modern copolymer, Wondergel provides uniquely comfortable support while eliminating pressure points. Sit hours longer in pain relieving comfort, even on very hard surfaces.

Cushions made from traditional materials such as foam, or memory foam, create “push-back”, so that before long you experience discomfort. Long lasting Wondergel uses the ingenious principle of column buckling. As pressure increases Wondergel columns buckle distributing weight “out and away”. Comfort is enhanced and blood flow is unrestricted, eliminating uncomfortable pressure points.

Wondergel provides immediate, continuous cushioning. No need to wait for foam to heat up or conform to your body every time you change position.

The result: a truly revolutionary advance in cushioning technology that provides the ultimate in sitting comfort.
