

# EMRx

## REDUCE paper, streamline patient encounters

Choosing an electronic medical records solution can be a frustrating process. You'd like to take advantage of current incentives, but don't want to get stuck with a system that ignores your unique office workflow.

Well, with EMRx you can not only cash in on early adoption incentives, you can also implement a customized solution that will parallel the current workflow of your practice.

Here's why EMRx is the right system for you:

**Simple solutions for complex workflows.** EMRx was designed by physicians, and is fully customizable to match your workflow. From the appointment book to chart completion, e-prescription, and billing - there's only a single screen to navigate.

**Fast patient encounters.** Physicians who use EMRx spend an average of 2 minutes documenting each patient encounter. Spend less time documenting and more time caring for patients.

**Implementation & Training.** The EMRx customized implementation plan allows for comprehensive training while reducing the disruption in office workflow. You get training on *your* time and on *your* terms.

It's the right time, and EMRx is the right system for you.

- Streamlined Patient Encounters
