

Dental Anesthesia

Opening Doors to Treatment

Central Coast

Dental Anesthesia

Some patients either require or would greatly benefit from treatment under anesthesia. You have seen them in your practice: the very young, those with special needs, the extremely anxious, and those undergoing invasive procedures. Put your patients and their families at ease by offering safe and effective anesthesia. Dr. Erik Winn is a Dentist Anesthesiologist with experience in treating patients with a wide spectrum of ages and conditions. Call to schedule a discussion of how anesthesia may benefit your practice.

Anesthesia can open doors to treatment that would otherwise never happen.
