

# Business VOIP/IP PBX Phone System

## Business PBX Features

IP PBX systems offer standard features to businesses that amount to major advances and cost savings on older technology. Voicemail, fax, unified messaging, teleconferencing, contact center capabilities, mobile accessibility and much more can be easily set up and utilized through an IP PBX. The up front expenditure to implement an IP PBX is much less than traditional, hardwired systems because Internet-based systems generally require far less hardware. IP PBX systems also tend to be all inclusive, and features like call waiting, three-way calling, caller ID and more are standard rather than a la carte.

## Standard PBX Features

- Low Cost PBX system hosted in the cloud
- Use your phone anywhere there is Internet
- Auto-Attendant /Virtual Receptionist
- Voicemail to Email
