

# High-Rise WIFI

for body's corporate

**BULK SUPPLY** of NBN-type Internet speeds delivered to all residents at wholesale prices  
**HD WIFI** designed specifically for high-rise buildings, using next-generation WIFI technology  
**AUTOMATED BILLING** and payment system that's simple, easy to use and available 24/7

# Why Body's Corporate need to provide High-Rise WIFI?

On average, every Australian has 2.6\* wireless devices.

The demand and consumption of digital content and the way it is delivered to tenants, owners, guests, and consumers is increasing exponentially every day. This massive increase in digital demand means Body's Corporate need to ensure that their buildings Communication, Internet and WIFI infrastructure is upgraded properly to cater for such mass amounts of digital demand by residents.

*"Internet is now considered by many as a utility, just like water, gas and electricity"*

We can help Body's Corporate plan, project manage and bulk supply all aspects of upgrading and implementing a High-Rise WIFI build that is designed from the ground up for high-rise buildings.

## meet resident demand

Ensure that your building/s residents have access to proper digital connectivity, NBN-type speed Internet, and HD WIFI using a bulk supply service that is scalable with future usage and growth

## increase building value

Help owners/investors increase their ROI on their apartments by providing bulk high speed internet services that's delivered through a state of the art HD WIFI system designed for your building

## fully managed service

Our connected community platform is a complete managed service which helps minimize a Body's Corporate involvement in the day-to-day operations, and resident billing of the services
