

WALK THROUGH YOUR DREAM HOUSE LONG BEFORE ITS FINISHED

VASTview Studios creates highly interactive 3D marketing solutions for real estate developers that sell homes faster and increase upgrade purchases.

VASTview is a leading Australian market, developing Virtual Reality (VR) for Architectural Firms, Developers, Building Companies, Real Estate Agents, Marketing Agencies and Private builders.

We proudly offer the latest technology in virtual Reality (VR) by converting the 2D plans into 3D modeling and allowing costumers to perform interactive walkthrough, along with complete range of customisation such as environment, materials, textures, lighting and objects which contribute to the final customer decisions.

Moreover, stunning panoramic snapshots captured by hi-tech drones, gives the actual outlook view specially for hi-rise apartments.

**VIRTUAL REALITY GIVES
YOU TASTE OF THE
FUTURE**

VIRTUAL REALITY

Give your clients a better look & feel of their property. This helps sales and raises customer comprehension.

Provide interactivity and a range of brand new features that helps you stand out from competitors.

3D INTERACTIVE WALKTHROUGHS

Our software enables you to create immersive, true-to-scale walkthroughs on your computer with one click.

Interactive walkthroughs allow customer to experience their space and envision their new home.

COMPLETELY CUSTOMISABLE ENVIRONMENT

Clients can customise in real time inside the 3D model.

They will be impressed with the flexibility range of customisation. E.g. change the colors, textures and materials of the walls, floors and furnitures etc.

ARCHITECTURAL 3D RENDERING

Photo Realistic Imaging enhances marketing by giving an eye-catching view, improves visual communication and controls project costs.

It gives accurate information about the building and structure from any angle which makes the task of the architect, builder, engineer and customer easier.
