Lighting the way to Goal ZERO

APOLLO
Energy Services Corp

LED Light Tower Specifications

SA20 (20' LED Light Tower)

COMMERCIAL ADVANTAGES

Apollo Energy's lighting systems can replace multiple conventional systems with high efficiency stadium lighting reducing overall costs while providing unmatched lighting quality.

- Unit can be powered from a simple 15 amp wall receptacle. By utilizing LED lighting and DC Hoist equipment this system will run off a standard 15amp receptacle reducing the need for multiple light towers with generators

ENGINEERED ADVANTAGES

- Portable Skid Mounted; 8' x 8' deployed footprint
- Extended height: 21 ft.
- Locking, Stand-alone, non-guying;
- LED lighting: Approx. 120,000 Lumens
- 15 Amp power feed (standard receptacle)
- Full 100% engineered systems (each unit is certified compliant)
- We meet all CSA requirements for —45 steel structures
- Detailed Unit O&M's for optimal training and operations
- Drops compliant (Eng. Reviewed)
- Full integrated PM system to ensure proper equipment maintenance and tracking
- Inspection criteria modeled after COADC mast inspections
- Trained certified staff, Detailed Installation Checklist w/ sign off

SAFETY AND ENVIRONMENTAL ADVANTAGES

- Rated Sustained wind Speed: 113 KM/HR*
- Rated Gusting Wind speed: 225KM/HR*
- CO2 Reduction "Reducing Emissions"
- Zero working fluids = Zero spill potential
