Note: The purpose of this page is to collect information necessary to register a device for configuration, essentially to get the schoolname, purchaser name, student name.

For purchased devices, we collect the user info and have the technical information. If the school and device are already known from landing and order page they are NOT changeable by user; can only add additional info.

If the school and device are NOT known from order page, we need to collect the information about school, device they have.

Note that NOT all BYOD devices can be enrolled, so if selection is "Enroll existing device" there will be an additional step before we can complete the order - device validation.

YOUR WEBSITE

Web Design Contract

We will always do our best to fulfil your needs and meet your goals, but sometimes it is best to have a few simple things written down so that we both know what is what, who should do what and what happens if things go wrong. In this contract you won't find complicated legal terms or large passages of unreadable text. We have no desire to trick you into signing something that you might later regret. We do want what's best for the safety of both parties, now and in the future.

You, Customer's name, are hiring Company Name located at Company's Address to design and develop a web site for the estimated total price of £ Price outlined in our previous correspondence. The agreed payment plan is at the end of the document.
