

HEMEOS

An Independent
Bone Marrow
Transplant Registry

Our Mission

Hemeos believes that all bone marrow transplant patients should have a donor match delivered on time at an affordable price. To that end we are building a world class registry to help Transplant Centers treat their minority patients. We are committed to proving customer service excellence second to none.

What we Do

As a total transplant procurement solution, Hemeos vertically integrates as a registry and donation center to maximize efficiency and provide operational excellence to deliver marrow/PBSCs on time - at industry leading prices. Hemeos harnesses industry leading best practices to target, recruit, and maintain active donors with unprecedented donor follow through rates. Transplant Center clients access these donors through our web based software, Prometheus. Once identified as a potential match, Hemeos guides donors through CT, workup, and collection. We then personally deliver the product to our transplant center clients.

Our Partners

Highlights

-  100% domestically sourced donor base
-  Emphasis on Black and Hispanic male donors in the 18-29 year old demographic
-  Reduced cycle time resulting from our donor/collection center co-location strategy
-  24/7 access to a designated Hemeos donation coordinator from confirmatory typing through delivery to Transplant Center
-  Industry cost leader
-  Secure, user friendly web site to easily access and search the Hemeos donor database and track the progress of current donations
-  Courier service by Hemeos employees

Powered By Prometheus

Hemeos uses the Prometheus BMT software platform, developed by Steiner, an industry leader used in 30+ international registries.

- Ease of Use: Transplant coordinators will conduct preliminary search, CT, and workup request through a simple, intuitive web portal (shown below)
- Detailed Search Results: There are 100+ display fields that coordinators can customize to receive the donor information they need most
- Match with Confidence: Prometheus' matching algorithm has been featured in peer reviewed medical journals as one of the most reliable matching algorithms in the world

ISO Accreditation

- 9001 (Quality Management System)
- 27001 (Information Security Management System)

Why Choose Hemoes

Efficient

Increase donor availability from our domestically sourced registry;
Reducing cycle time from donor contact to HCT/P delivery.

Targeted

Donor base recruitment focusing on minority males (18-29 year old).

Responsive

24/7 access to a personal Hemoes donation coordinator from initial match to HCT/P delivery.

Intelligent

Secure, intuitive website to easily search the Hemoes database and monitor donations in progress.

Professional

HCT/P transport provided by a dedicated Hemoes team member.
