

COMPANY OVERVIEW

WHO WE ARE

OGS is a global organisation with corporate operations in Perth, Houston, Europe and Singapore. We offer multidisciplinary engineering services in oil & gas (onshore and offshore) in both greenfield and brownfield scopes. Continuing to build upon an impressive global portfolio, OGS can provide complete and independent project solutions, from concept studies through start up, with continuing support throughout a project's life-cycle. OGS can handle any portion of the project required, large or small; and OGS delivers.

Six core business streams are offered:

1. Project Engineering Management (Multi-discipline)
2. Completions & Commissioning Services (Systems, Processes, Resources)
3. Hazardous Area Validation & Inspection
4. Specialist Identification Deployment and Management
5. Agencies
6. Technology- 3rd Generation Commissioning Software:

COMPANY OVERVIEW

WHO WE ARE

Silverhorse provides you with the ability to manage your completions, your way, with fast implementation times as a result of Silverhorse's meta data driven design.

SILVERHORSE PROVIDES:

- Simple to use functionality to create and manage work scope, Punch lists and certificate toll gating
- Efficient processing of completed work through the use of Test Sheet scanning technology and mobile devices
- Dedicated manager functions for Cable and Piping
- Inspection connect for mobile devices that does not rely on being connected to the Internet at all times to function
- Real time Progress reporting
- Full visibility of Contractor progress
- Increased project governance without the requirement for increased administration resources

TO MANAGE THE PROJECT, YOU NEED TO MANAGE THE PROCESS.

- ✓ Governance technical security
- ✓ Informed decision making
- ✓ With detailed audit security

COMPLETIONS CONNECT MANAGES:

- Completions Testing
- Punch Listing
- Hazardous Area Inspections
- Environmental Inspections
- Site Inspections
- Maintenance and Preservation Activities
