This panel evaluates the potential risk of heart disease, stroke, and heart attack and should be taken by anyone who has a family history of heart disease or by anyone who feel they suffer any heart disease symptoms.

**Hair Loss Test****CTF \$299 PP \$399 RP \$900+**

Our detailed and comprehensive blood testing will help to inform us if there is a medical issue responsible for your hair loss as well as provide an excellent snapshot of your overall organ health, hormone levels, and risks for potential life threatening health issues. We usually find underlying issues in over 25% of the people that we test and mostly years before any other serious symptoms would occur. This important tool allows our medical personnel to properly determine the correct hair program that best fits your needs.
