

WHY we do what we do

BloodPanel.com is focused on helping doctors and medical facilities cut costs, add new revenue streams, and provide better cost effective laboratory services to their patients.

Our Programs

- Help save the facility money
- Make the facility money
- Give the patients higher quality better services
- Provide these patient services at lower prices

HOW we do it

BloodPanel.com uses advanced proprietary technology combined with high Volume national accounts to provide high quality laboratory testing services faster and cheaper.

We

- Provide faster testing results
- Provide a solution for cash pay patients
- Streamline and simplify the Laboratory testing process
- Eliminate the high cost laboratory testing barrier for procedures that require it

RESULT of what we do

BloodPanel.com provides laboratory testing solutions that lower the costs to patients, streamline the laboratory testing process, and helps to generate additional revenue to your facility.

Your Facility

- Gets test results faster
- Eliminates high cost testing barriers
- Generates additional revenue streams
- Provides cheaper costs to cash pay patients

Registration & Setup Process

Register at the website by completing the simple online registrations form or by calling our toll free number at **800-792-1844**. Once registered you will be contacted to schedule training on the program by one of our program specialists.

Order Process

Once registered and trained you can order testing one of two ways.

Option 1 - Order through our HIPAA Compliant Order Application (preferred)

Log into HIPAA our compliant testing order system and add patient, billing information, and choose specific panels or tests and click submit.

Option 2 – Fax order to our Secure Fax Order Line

Complete the provided blood order form and fax it back to our secure test order line.

Once the order is entered or received a laboratory testing requisition is created and sent directly to the patient with directions on how to get the testing completed.

After the test is completed results are sent directly back to your medical facility usually within 24/48 hours.
