Weight Loss

### Why?

- Provide better pricing and service to your patients
- Get a fast 24-48 hour turnaround on results
- Fast HIPAA compliant patient order management system
- Generate additional revenue streams for your facility
- Offer additional advanced testing at discounted pricing
- Over 8,000 different tests and panels available
- Access to over 4000 Patient Facilities

### Steps:

1. Sign Up
2. Log into the system
3. Place test order
4. Receive results and treat patients

### How It Helps:

- 
1. Provides wholesale pricing to your non-insured or cash pay patients to help them save money
  2. Removes the lab testing price barrier for patients who want another procedure that requires tests
  3. Include the testing as part of your packaged procedures or program and generate additional revenue

**Initial Male Testosterone Therapy Test – Cost \$250.00 Suggested \$325.00 Retail = 700+**

A detailed panel of tests that will determine if a male is suffering from testosterone related medical issues. Some symptoms are weight gain, sleeplessness, low sex drive, fatigue, loss of muscle mass, and depression.

**Follow-up Male Testosterone Test for Patients on Therapy –Cost \$150.00 – Suggested 199.00 Retail = 425+**

Successful and safe ongoing Testosterone therapy requires ongoing tests to measure and maintain hormone levels.

**Weight Loss Panel (For all medicated weight loss programs) – Cost \$299.00 – Suggested \$399.00 - Retail = 750+**

Prior to any medically monitored weight management program a patient is suggested to take this test to help rule out any unknown underlying health issues.

**Weight Loss Panel for HCG - Cost \$151.00 Suggested \$225.00 - Retail = \$600+**

Prior to patients starting a weight management program using HCG it is recommended that this test be taken to rule out any unknown illness, measure diabetes, and test for pregnancy.

**Men's Comprehensive Hormone - Cost \$299.00 – Suggested \$399 -Retail = 900+**

This panel contains everything from the basic and enhanced and will also evaluate specific hormonal values, testosterone production, pituitary gland insufficiencies and the body's ability to produce insulin and metabolize blood sugar.

**Women's Comprehensive Hormone – Cost \$391 Suggested \$491 - Retail 1200+**

This panel contains everything from the basic and enhanced and will also evaluate specific hormonal values, testosterone production, pituitary gland insufficiencies and the body's ability to produce insulin and metabolize blood sugar. It will also test specific hormonal values such as, testosterone production, estrogens, infertility factors and pituitary gland insufficiencies.

**Heart Check & Comprehensive Cholesterol Panel – Cost \$149 Suggested \$221 - Retail = 450+**

This panel evaluates the potential risk of heart disease, stroke, and heart attack and should be taken by anyone who has a family history of heart disease or by anyone who feel they suffer any heart disease symptoms.

**Hair Loss Test – Cost \$299 Suggested \$399 - Retail 900+**

Our detailed and comprehensive blood testing will help to inform us if there is a medical issue responsible for your hair loss as well as provide an excellent snapshot of your overall organ health, hormone levels, and risks for potential life threatening health issues. We usually find underlying issues in over 25% of the people that we test and mostly years before any other serious symptoms would occur. This important tool allows our medical personnel to properly determine the correct hair program that best fits your needs.
