RIDE TO THE EDGE

OCTOBER – DECEMBER 2016

The Tour

Ride to the Edge of Australia with Taber and Damo as they embark on a motorcycle journey to raise funds for *beyondblue*, a non-profit that provides services supporting people struggling with depression and anxiety.

Kicking off in Sydney on 18 October 2016 with their first major stop at the MotoGP in Melbourne, their travels will take them over 17,000 km, visiting every state and capital in Australia.

beyondblue is a non-profit organization that supports people living with depression and anxiety by providing online resources, support services, detailed contact information, guidelines for carers, and much more

Our Fundraising Target: \$34,000

RIDE TO THE EDGE

THE MATES

TABER AKA TAZR

Spending parts of his youth in both Sydney's Inner West and the Blue Mountains, Taber enjoys a multitude of settings, from the solitude of the countryside to the heart of bustling cities. Ever the intrepid traveller, he spends as much time possible exploring new locations, both domestically and internationally. He has even lived abroad and admits he finds the sounds of foreign language soothing and peaceful.

Taber has been riding for 10 years and has wanted to travel the whole of Australia by bike for almost as long. With a family history of depression, including experiencing his own personal struggle, a ride to raise funds for *beyondblue* perfectly blends his love of exploration with his desire to support others in need.

DAMO AKA DAMR

Damo grew up in Sydney's Inner West and developed an early fascination with exploration and adventure. He has been riding since 2012, fuelling his love of travel with the camaraderie and freedom that a motorcycle provides. The sense of empowerment he gets from riding matches the spirit of the fundraiser – he wholeheartedly believes in the services provided by *beyondblue* and hopes that together their travels will help to support both friends and strangers in need.

An engineer at Foxtel, Damo utilizes his lifelong computer experience and natural intuition with technology not only within his career, but also in his free time. When he's not out on the open road, his inventive spirit is happy spending time working in the garage maintaining his ride or creating and building cool projects.
