Sight is precious... Don't you think? We would love to have the opportunity to care for your family's vision. Most of all, we want you to know that.... WE CARE!

- Opening Your Eyes To Clearer Vision
- A Personalized Approach To Vision Correction
- Committed To Excellence In Vision Care

Our welcoming staff has one common goal – providing you with the best vision care possible and assisting you in finding you the finest eyewear that suits your lifestyle. While many big chain stores employ sales consultants to sell you glasses or contacts, our practice is comprised of knowledgeable individuals whose primary goal is to provide you with a high level of customer service all while ensuring you get the eye care you need and deserve.

## True Experts of Eye Care

Many people resort to the simple solution of purchasing glasses at a drug store or pharmacy, but it could cost them their vision.

Our optometrists are skilled at not only detecting typical refractive errors (nearsightedness, farsightedness, and astigmatism) and prescribing the proper corrective eyewear, but also finding eye diseases in their early stages. You can't get that from a convenience store.

Without regularly scheduled eye examinations, you may not realize that you are suffering from an eye disease until it affects your vision and may be more difficult to treat.

## Personalized Patient Care & Treatment

Refractive errors and other eye problems are common; however, not all ocular conditions are the same. At our practice, each patient is given a comprehensive eye examination, which allows our optometrist to get the whole picture of your eye health and find potential vision problems.

Only after carefully reviewing the findings of your exam, do we offer a treatment plan. If you do have a refractive error and are unsure of your options, our optometrist can help you decide between eyeglasses and contact lenses. We can also discuss the pros and cons of refractive surgery, like LASIK.

At our office, we take the time to give you the comprehensive vision treatment that you need and deserve.

## Why Us?

- We treat you like a VIP - every experience you have with us will leave you knowing you received the VIP treatment
- We are here to serve YOU - we offer same day appointments and convenient clinic hours
- Our caring doctors are experts in eye care including advanced contact lens fits and the treatment of eye diseases
- We have the best trained and friendliest staff devoted to your care
