

OPEN TEAM

CONNECT TO THE NEXT LEVEL

MANY INSPIRING PROJECTS TO DISCOVER

An increasing number of changemakers are working passionately
to solve social and environmental challenges.

BUT TODAY: INITIATIVES OFTEN WORK IN SILOS

Changemakers are often isolated and working in silos, sometimes reinventing solutions that already exist in other countries, finding it hard to connect to the right individuals, funders and communities.

**ENVIRONMENTAL
AND SOCIAL PROJECTS**

AND NETWORKS**

OUR MISSION: CONNECT TO THE NEXT LEVEL

Open Team provides a web platform that connects
changemakers and citizens from all around the world
And enables them to easily find what they need when they need it:
resources, partners, experience feedback...

SNAPSHOT OF THE BETA PLATFORM

Map of projects where members can search based on specific criterias,
and then open the project profile page of their choice:

The screenshot displays the 'OPEN TEAM' platform interface. At the top, there's a navigation bar with the logo 'OPEN TEAM CONNECT TO THE NEXT LEVEL', a search bar, and user information for 'Sudarshan' with a 'Log out' link. Below the navigation bar, a section titled 'Discover inspiring projects to collaborate with' features a search bar and three filter menus: 'Interest area' (Education, Agriculture, Energy, Health), 'Geographic location' (Antarctic, Africa, Asia, Europe, North America, Central&Latin America), and 'Project maturity' (<1 year, >1 year, >2 year). To the right of these filters are icons for a grid view and a location pin. The main area is a world map with numerous purple location pins. A red-bordered inset shows a photo of people in a field. On the right, a detailed project profile for 'SPIRAL FARM HOUSE' is displayed. It includes a mission statement, main activities, tags (biodynamic, farming, youth education, rural), phase (Building), website, other links/video, team information (founders and members), part of a community status (YFIN), needs (youth volunteers, funding, cows, community manager), and resources (biodynamic expertise). At the bottom of the profile, there's a 'SUPPORT THIS PROJECT' section with buttons for 'FOLLOW', 'HELP', and 'PARTNER'.

ACTORS ON BOARD

Our first “white-label” client:

the French Ministry of Environment, that will bring forward 100 positive initiatives of changemakers worldwide on our platform, to inspire French citizens by voting

Our pilot partner for the collaborative platform:

Regeneration International, a global network uniting promoters and practitioners of regenerative agriculture, with whom we are building Regeneration Hub, the global platform to connect all regeneration stakeholders

Our pilot project aggregators in France:

several communities of social and environmental projects
(YESS, Artisans du Monde, Paris Social Business Hub, Social3.0,
Fondation Nicolas Hulot, Fondation GoodPlanet...)

Our coworking space and sponsor in Paris:

Officienne, that hosts and coaches our team by its start-up coaches

OUR BUSINESS MODEL

WHITE LABEL

Dedicated web platform,
connected to the Open Team
database of members

Target :
communities, networks,
companies, universities

AFFILIATION

Co-registration partnerships
with revenue-sharing

Target :
social networks,
digital service providers

PROJECT SOURCING FEE

Benchmark, selection and impact-
measurement of projects.
Optional coaching on project collaboration

Target :
project funders,
project-sponsoring companies

FINANCIAL INTERMEDIATION

Contact-making and relationship development
between projects and funders,
with % taken on amount raised

Target :
international collaboration projects,
large project funders

OUR PRINCIPLES

A social business:

We are building the legal structure of an enterprise but with a social/ environmental purpose first, reinsertion of majority of profits in the organization to grow in impact, and with a transparent and responsible governance

Alignment in vision and values:

Alignment on the vision to enhance collaboration between changemakers based on our core values is key in the choice of our partners, clients and funders

Building bridges beyond barriers and frontiers:

Open Team is not community but aims to connect communities together, including those that are most unaccessible (small farmers, indigenous tribes...). We believe that we are ALL one.

REGENERATION HUB

Context:

A growing number of climate, food, environment, health and justice advocates are embracing and promoting a world-changing concept: regeneration. There is currently no map that exists for regenerative projects worldwide, though many exist for practices that fall under the umbrella of regenerative.

Solution:

Regeneration Now, an online tool aiming to map, support and showcase active regenerative projects worldwide

Objectives:

- 1 - Help citizens to identify local regeneration projects to support
- 2 - Collect and showcase case studies to pressure policymakers
- 3 - Show potential investors that there is a growing need and demand for support for regenerative projects
- 4 - Demonstrate the multi-faceted benefits of regenerative systems for landscape restoration, soil regeneration and water-retention, biodiversity, and restoration of climate stability
- 5- Ultimately inspire new regenerative projects

NEEDS AND CHALLENGES THAT WE AIM TO MEET

Aggregating dispersed regeneration projects worldwide in a decentralized way, and integrating them into one open-source database with a user-friendly mapping interface

Enabling projects to share resources and best practices across sectors and countries within the regeneration movement, including farmers with reduced access to the web

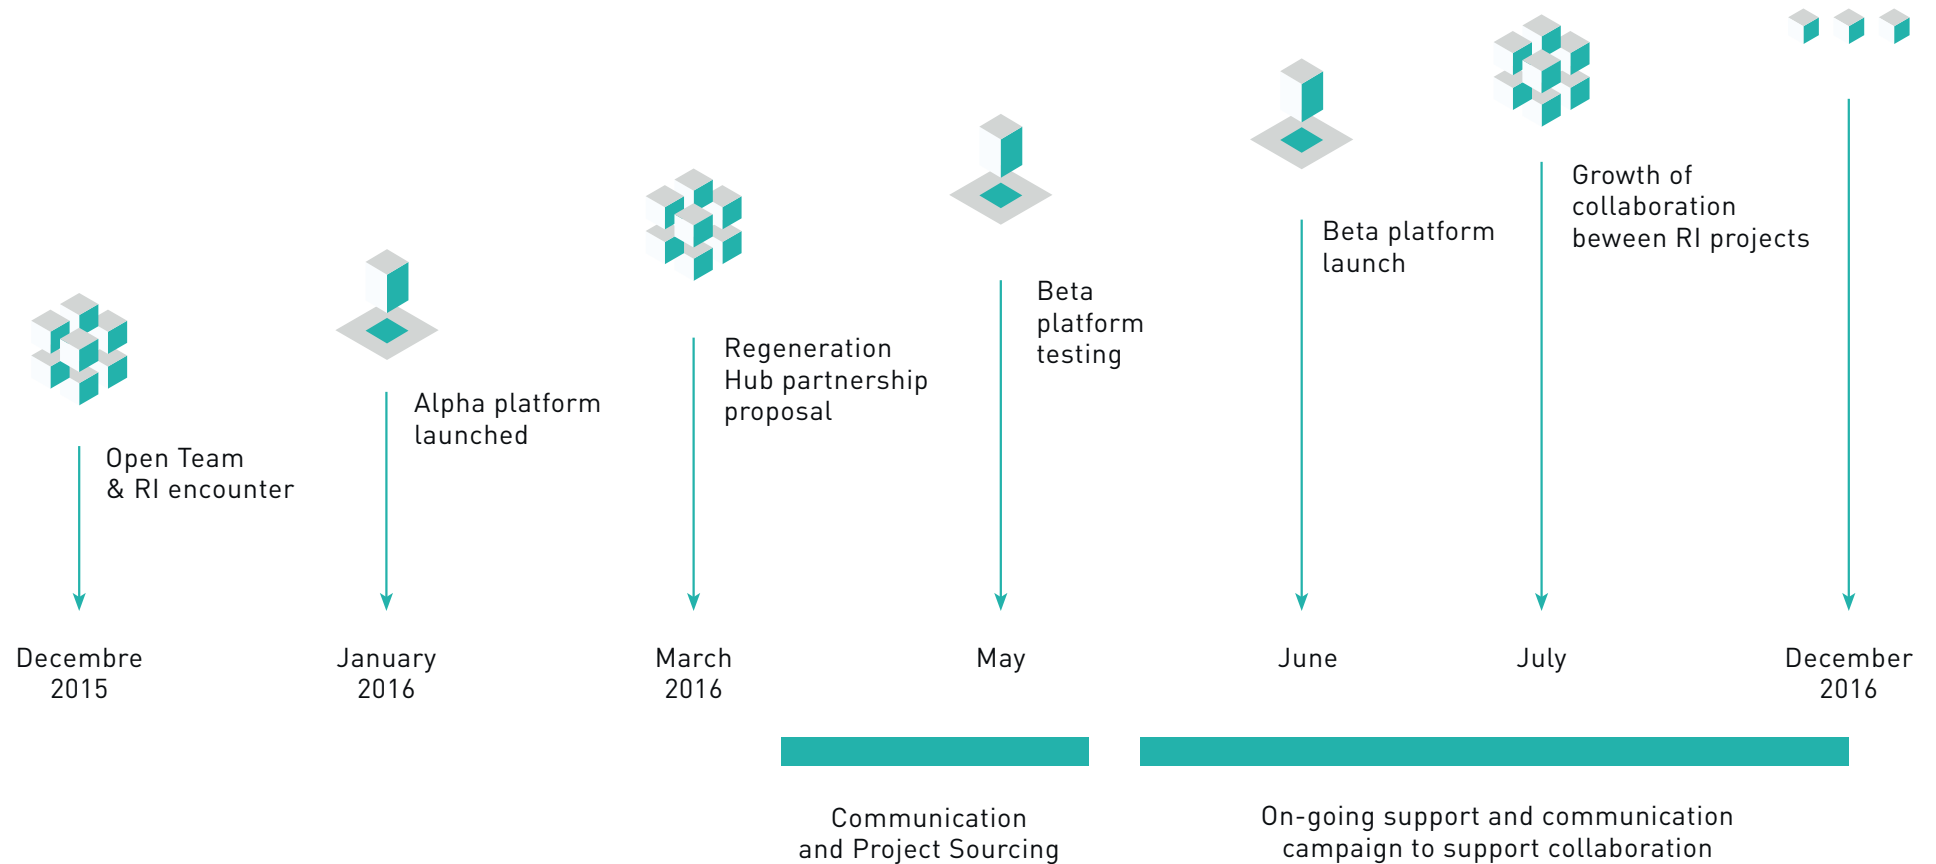

Visualizing and measuring the growth of the regeneration movement, through platform statistics

Actively growing the regeneration movement by enabling individuals to take part in regeneration initiatives and be inspired to launch new projects

PROPOSED PLANNING

THANK YOU!

WE LOOK FORWARD TO FURTHER COLLABORATING TOGETHER!
