

GUARD DOG

Computer Protection and Security for your Home

At Little Dog Tech, we have years of experience protecting the computers and networks of our commercial business clients. Now, we are making the same Enterprise Grade security and protection available to our home users for a flat monthly rate. It's like having your own personal IT department!

- Centrally managed and monitored antivirus & antimalware to stop malicious zero-day threats before they have a chance to infect your computer.
- Centrally monitored online backups of your files, folders, or even the whole operating system to protect precious data that could be damaged by viruses, fire, theft, or other disasters.
- Centrally managed web filtering customizable to 4 different levels of protection to keep your family safe.
- Automatic update and patch installation for Microsoft Windows as well as 3rd party software and plugins such as Java, Flash, and many others to close security holes and eliminate the guesswork of which updates to install.
- 24x7x365 monitoring of critical Windows services and hardware health, designed to alert you to problems BEFORE they happen.
- Automated maintenance cleaning of your computer to keep it running smooth.
- Discounted rates for on site or remote service calls for Guard Dog clients.

...and Guard Dog is more than just a collection of software. We also include a personalized one-on-one tutoring session to teach you how to safely navigate the internet and use your computer.
