THE CLIENT EXPERIENCE

The Consultation

1

The process begins with a thorough complimentary consultation.

One of our local Educational Directors meets in-person (or via Skype if necessary) with the parents and student to get to know each other and clarify the family's needs.

Match and Customization

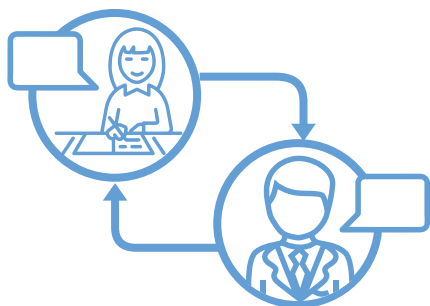

2

Students are matched with exceptional tutors based on an understanding of each student's unique learning style, goals, personality, and schedule.

The tutor(s) develop a personalized curriculum that aligns with the student's existing strengths and areas for improvement, while addressing all factors impacting performance such as test anxiety and self-confidence.

Partnership and Communication

3

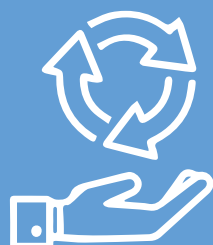

Families are supported by our tutors, directors, curriculum team, subject specialists, and HQ staff.

Tutoring sessions occur in the home, our offices, remotely or a location of the family's choosing.

Our custom-built, mobile-friendly "Dashboard" provides parents with:

- ✓ A detailed lesson summary after each session.
- ✓ Convenient practice test registration.
- ✓ Real-time tracking of student progress.

Ongoing Suite of Services

Educational Directors are compassionate and responsive, ready to provide guidance and seamless coordination of whatever services the student requires.

No matter where along the path our relationship begins, we can support students and families in a myriad of ways:

- ✓ Standardized Test Prep
- ✓ Subject Tutoring
- ✓ College Admissions Consulting

When appropriate, tutors introduce behavioral skills for students to improve executive functioning, organization, and time management.
