Why Try Physical Therapy First?

The Best Choice—PT is the best choice for the least invasive, fastest treatment approach to decrease pain and increase function. PT has many different tools to quickly decrease symptoms AND resolve dysfunctions permanently—returning you to your pain—free life!

The Early Choice—Early intervention is often the key to successful treatment. Don't wait—early physical therapy works fastest!

The Right Choice—Physical Therapy is the right choice because it treats the problem rather than just the symptoms.

Your First Visit—You will receive a full evaluation by your PT. This comprehensive visit will likely take 45-60 minutes and will identify your impairment (pain, muscle weakness, muscle tightness, deconditioning) that is affecting your overall function.
