are made through this office.

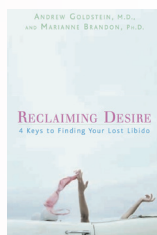

OUR BOOKS

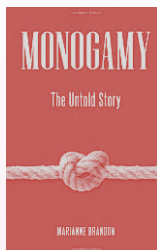

When Sex Hurts is a guide for patients that contains up-to-date information of more than the diagnosis and treatment on more than 20 different causes of sexual and vulvovaginal pain. It contains an algorithm that helps a patient and her health care provider determine the specific cause and treatments of her type of vulvar pain.

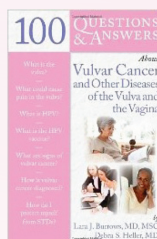

Female Sexual Pain Disorders: Evaluation and Management is the only textbook devoted to the diagnosis and treatment of vulvar and vaginal pain disorders and disease. More than 75 world-renowned scientists contributed chapters in this authoritative and comprehensive textbook.

Reclaiming Desire: 4 Keys to Finding Your Lost Libido outlines a highly effective holistic approach to treating decreased sexual desire. In addition, there is essential information on the ways in which major life events such as pregnancy, menopause, and divorce can affect a woman's sexual health.

Monogamy: The Untold Story: Dr. Brandon explains our non-monogamous instincts from an evolutionary perspective. Men and women are guided with compassion and wisdom in understanding their natural sexual tendencies to allow them to cultivate more sexy lovemaking - even in long-term, monogamous relationships!

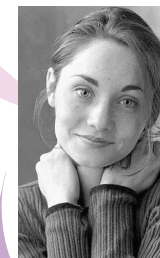

100 Questions & Answers About Vulvar Cancer and Other Diseases of the Vulva and Vagina: provides practical, authoritative answers to the most common questions asked by women diagnosed with cancer of the vulva/vagina and related gynecologic diseases.

THE CENTERS FOR VULVOVAGINAL DISORDERS

Washington DC · New York City · Annapolis MD

For more than two decades, the Centers for Vulvovaginal Disorders have been referral centers for the treatment of vulvodynia, sexual pain disorders, dermatologic diseases of the vulva, recurrent vulvovaginal infections, and female sexual dysfunction.
