

Large Meter Test Bench System

Series 2400 Double Row Bench

Series 3-500, Dual Stage Auto Shutdown

Water Meter Test Bench Systems Are An Integral Component In Today's Modern Water Meter Shops

Description

The MARS Company Test Bench System provides the utility the ability to grade their existing and new meters, test more meters at a time, reduce the test time, generate highly accurate results and certify the employee by both training and assisting on the installation of the system.

The result for the Utility is increased productivity, more accurate meters and most important of all, increased recovered revenue.

Gravimetric System (optional):

The optional gravimetric system operates five (5x) times faster than traditional volumetric meter testing equipment. The automated and computerized system results in highly accurate and unattended meter testing with data that is accessible by your network. Our scale systems are NIST Traceable with unsurpassed repeatable accuracy to within 1/10%. MARS also offers an optional wireless handheld for data entry and remote test monitoring.

Features & Benefits

- Increased Revenue Recovery
- Test More Meters At A Time
- Reduce Meter Test Time
- Highly Accurate Results
- Employee Certification Training
- Increased Productivity
- More Accurate Meters
- Ability To Grade Existing & New Meters
- All Systems Upgradeable & Intrinsically Safe

Specifications

- Test Bench Systems Available To Test Meters From:
 - 5/8" x 1/2" through 16"
 - 13 mm through 400 mm
- Fully Compliant AWWA M6 Parameters
- ISO 4064 Compliant For Systems Installed Outside U.S.
- Volumetric & Gravimetric Operation Available For All MARS Systems.
