

Introducing The First Scalable Water Meter Testing Enterprise Software Suite Designed Specifically For The Waterworks Industry

For over 30 years MARS Company has proven itself in the waterworks industry as the leader in providing custom designed and fabricated Meter Testing Systems. With over a century of combined experience, MARS Company takes pride in its commitment to consistently evaluate market trends and customers needs.

Water utilities are consistently challenged to improve operations, increase conservation efforts and provide safe, clean drinking water to their constituents in the most fiscally responsible manner. MARS Company genuinely understands the challenges faced by our customers, and strives to provide new and innovative solutions to assist in meeting their needs.

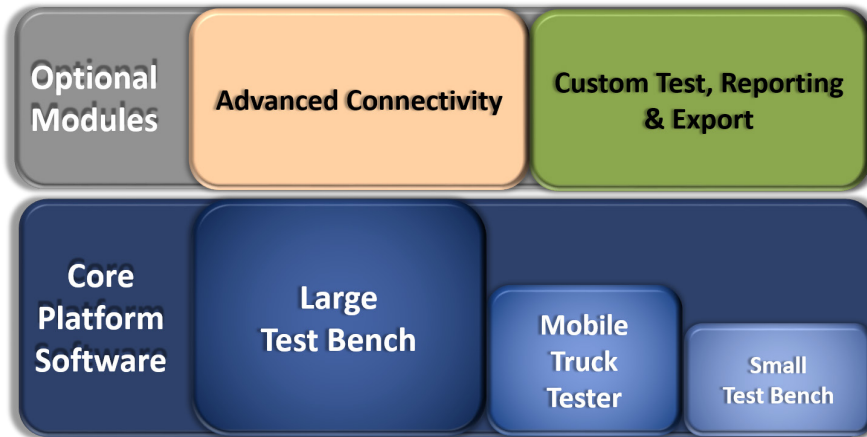

MARS Company's new Meter Management (M3) Software is the latest development allowing customers to easily harness the power of software and technology. The MARS Company M3 2016 Software Packages provide both new and existing customers with the ability to capture valuable meter testing data based on their individual meter testing programs. Custom reporting, extensive data exporting features and browser based access allow multiple departments the power of data analytics to improve customer service, implement operational improvements and make informed purchasing decisions.

Features & Benefits

- Run Unmanned Tests To Increase Efficiency And Reduce Errors
- Integration With Other Enterprise Network Systems (ERP Systems)
- Designed To Be Used With Hand held Tablet Devices For Ease Of Data Input
- Automated Operation Eliminates Operator Errors
- Perfect For Small And Scalable For Regional Test Facilities
- Expedite Customer Svc. Inquiries
- Generate Custom Reports For Legal Litigation
- Easy For IT To Manage
- AWWA M6 Standards Compliant

Modular Software Components

• Optional Software Modules

- Advanced Connectivity Module
- Custom Test, Reporting & Export Module

• Core Platform Software - 3 Configurations

- Large Bench (3" Meters+)
- Mobile Tester (Trailer or Truck Mounted)
- Small / Medium Bench (< 3" Meters)

Core Platform Software Features

- Windows Compatibility - Win7/8/10+
- Program Expandable for Future Features
- Programming Language
- Database Type
- Database Flexible for Future Use/Features
- Database Stored Locally
- API-Based Architecture
- Single User Support
- Standard Report Generation
- Optional Multi-Bench Support With Connectivity Module
- Standard AWWA Test Templates

Optional Module Features

• Advanced Connectivity

- Local & Remote Web Browser Interface for Admin/Reporting
- Multi-User Role-based access to program and database
- Native Handheld Tablet Support
- Local & Remote Single Admin Interface for multi-bench config.
- Multi-Bench, Single Network DB

• Custom Test, Reporting & Export

- Custom Test Capability
- Individual Meter Reporting Capability
- Test Run Reporting Capability
- Extensive Data Export Features
