

SUSTAINABLE

Compared to traditional stone surfaces, Earth Anatomy veneer covers more surface area while consuming less stone.

HIGH STABILITY

Stone surfaces are more stable than many other types of surface.

HARD & DURABLE

Earth Anatomy veneer is resistant to impact, abrasion, extreme temperatures, and open flame.

NATURAL BEAUTY

Stone has been used in fine architecture for centuries, thanks to its distinct appearance and unique qualities.

VAST SELECTION

Earth Anatomy veneer is available in a variety of sizes, colors, and thicknesses suitable for many applications.

raw earth for a wild imagination

Earth Anatomy's thin stone veneer is natural stone, the same that's been used for thousands of years of building for its beauty and ruggedness. Our veneer creation processes reveal new qualities of stone, making it lightweight, flexible, and even translucent in some cases.
